CONTRACTILE PROTEINS

CHAPTER

1

Myosin Structure and Function

ROBERT S. ADELSTEIN AND JAMES R. SELLERS

I. Introduction 3
II. Methods 4
 A. Purification of Smooth Muscle Myosin and Myosin Fragments 4
 B. Phosphorylation of Smooth Muscle Myosin Heavy Chains 5
 C. Preparation of Antibodies to the 204- and 200-kDa Heavy Chains 5
III. Analysis of the Primary Sequence of Smooth Muscle Myosin Heavy Chain 6
 A. Sequence Comparison of Smooth, Nonmuscle, and Skeletal Muscle Heavy Chains 6
 B. Comparison of Domains of the Heavy Chains to Three-Dimensional Structure of Chicken Skeletal Muscle Subfragment-1 7
IV. Alternative Splicing of Smooth Muscle Heavy Chain Pre-mRNA 11
 A. Introduction 11
 B. Alternative Splicing of Smooth Muscle Heavy Chain: Carboxyl Terminal 12
 C. Alternative Splicing of Heavy Chain: Head Region 14

D. Expression of Smooth Muscle Myosin Fragments 15
V. Kinetics of Regulation 16
 A. Kinetics of ATP Hydrolysis by Actomyosin 16
 B. Cooperativity between the Two Heads of Myosin 17
VI. Perspectives 18
References 18

CHAPTER

2

Myosin Light Chains

KATE BÁRÁNY AND MICHAEL BÁRÁNY

I. Introduction 21
II. Methods 21
 A. Purification of the Light Chains 21
 B. Phosphorylation–Dephosphorylation 22
 C. Phosphopeptide Mapping 22
 D. Phosphoamino Acid Analysis 22
 E. Isolation of Phosphopeptides for Sequencing 23
 F. Antibodies for the Phosphorylated Light Chain 23
 G. Exchange of Light Chains 23
III. Regulatory Light Chain 23
 A. Isoforms 23
 B. Amino Acid Sequence of the Isoforms 24
 C. What Is the Functional Significance of LC20 Isoforms? 25
 D. Phosphorylation 26
IV. Essential Light Chain 29
 A. Isoforms 29
 B. Amino Acid Sequence of the Isoforms 29
 C. What is the Functional Significance of LC17 Isoforms? 30

- V. Interaction between Light and Heavy Chains 32
- VI. Binding of Divalent Cations by Light Chains 32
- VII. Perspectives 33
- References 33

CHAPTER

3**Myosin Regulation and Assembly**

KATHLEEN M. TRYBUS

- I. Introduction 37
- II. Structure of the Light Chain Binding Region 37
- III. Control of Assembly by Light Chain Phosphorylation 38
 - A. The Folded-to-Extended Conformational Transition 38
 - B. Light Chain Mutants Identify Regions That Stabilize the Folded Monomeric Conformation 39
- IV. Phosphorylation-Dependent Control of Myosin's Motor Properties 40
 - A. ATPase and Motor Properties of Smooth Muscle Myosin 40
 - B. Structural Elements Required for Phosphorylation-Dependent Activation 40
 - C. What Is the Role of the Rod in Regulation? 41
- V. Filament Structure 42
 - A. Requirements for *in Vitro* Assembly 42
 - B. Polarity of Filaments 42
 - C. Role of the Nonhelical Tailpiece 44
 - D. Filament Assembly-Disassembly *in Vivo* 45
- References 45

CHAPTER

4**Actin and the Structure of Smooth Muscle Thin Filaments**WILLIAM LEHMAN, PETER VIBERT, ROGER CRAIG,
AND MICHAEL BÁRÁNY

- I. Introduction 47
- II. Smooth Muscle Actin 47
 - A. Methods 48

- B. Characteristic Properties 48
- C. Isoforms 50
- D. Amino Acid Sequence 50
- E. Interaction with Thin Filament Proteins 50
- F. Modulation of Polymerization 51
- III. Thin Filament Structure 52
 - A. F-Actin and Subfragment-1-Decorated F-Actin Structure 52
 - B. Thin Filament Structure in Skeletal Muscle 53
 - C. Thin Filament Structure in Smooth Muscle 54
- IV. Perspectives 58
- References 58

THIN FILAMENT AND CALCIUM-BINDING PROTEINS

CHAPTER

5**Tropomyosin**

LAWRENCE B. SMILLIE

- I. Introduction 63
- II. Tropomyosin Levels in Smooth Muscles, Purification, and General Properties 64
- III. Isoform Diversity of Skeletal and Smooth Muscle Tropomyosins 64
- IV. Tropomyosin Genes, Origin of Isoform Diversity, and Amino Acid Sequences 66
 - V. Amino Acid Sequence and Coiled-Coil Structure 67
- VI. Actin Binding and Head-to-Tail Polymerization 70
- VII. Perspectives 73
- References 73

CHAPTER

6**Caldesmon**

STEVEN B. MARSTON AND PIA A. J. HUBER

- I. Introduction 77
- II. Preparation 77
- III. Structure of Caldesmon in Solution 78

- IV. Caldesmon as a Component of the Thin Filaments 79
 - V. Caldesmon-Actin-Tropomyosin Interactions 79
 - A. The Caldesmon-Tropomyosin Interaction 80
 - B. The Caldesmon-Actin Interaction 81
 - VI. Caldesmon Inhibition of Actomyosin ATPase Activity 83
 - VII. Tropomyosin-Dependent Inhibition of Actomyosin ATPase by Caldesmon 84
 - VIII. Ca²⁺ Control of Caldesmon Inhibition 85
 - IX. Caldesmon-Myosin Interaction 86
 - X. The Role of Caldesmon in Regulating Smooth Muscle Contractility 87
 - XI. Perspectives 88
 - References 88
- III. Amino Acid Composition of Smooth Muscle Calcium Binding Proteins 106
 - IV. Calcium Binding Properties of 12-kDa Calcium Binding Protein 106
 - V. Purification and Characterization of 67-kDa Calcimedlin 108
 - A. Ca²⁺ Binding Properties of 67-kDa Calcimedlin 108
 - VI. Calmodulin 109
 - A. Calmodulin and Smooth Muscle Contraction 110
 - VII. Isolation and Characterization of Caltropin 110
 - A. Ca²⁺ Binding Properties of Caltropin 111
 - B. Caldesmon Regulation by Caltropin 111
 - C. Regulation of Caldesmon and Heavy Meromyosin Interaction by Caltropin 112
 - D. Effect of Caltropin on the Caldesmon-Actin Interaction 113
 - VIII. Conclusion 114
 - References 115

CHAPTER

7

Calponin

MARIO GIMONA AND J. VICTOR SMALL

- I. Introduction 91
- II. Purification and Physicochemical Properties 91
- III. Isoform Diversity 92
- IV. Primary Structure and Genetic Variants 93
- V. *In Vitro* Activity 96
 - A. Interactions of Calponin with Other Proteins 96
 - B. Inhibition of Actomyosin ATPase and *in Vitro* Motility by Calponin 97
 - C. The Relationship of Calponin to Caldesmon 97
- VI. Molecular Domain Organization and Binding Motifs 99
- VII. Tissue Specificity and Localization 100
- VIII. Perspectives 101
- References 101

CHAPTER

8

Calcium Binding Proteins

RAJAM S. MANI AND CYRIL M. KAY

- I. Introduction 105
- II. Isolation of Calcium Binding Proteins 105

ENZYMES OF PROTEIN PHOSPHORYLATION-DEPHOSPHORYLATION

CHAPTER

9

Myosin Light Chain Kinase

JAMES T. STULL, JOANNA K. KRUEGER, KRISTINE E. KAMM, ZHONG-HUA GAO, GANG ZHI, AND ROANNA PADRE

- I. Introduction 119
- II. Myosin Light Chain Kinase Activity *in Vivo* 119
 - A. Activation Kinetics 120
 - B. Myosin Light Chain Kinase Inhibitors 121
- III. Purification and Assay 122
- IV. Biochemical and Molecular Properties of Myosin Light Chain Kinase 123
 - A. Calmodulin Binding Domain 124
 - B. Catalysis 125
 - C. Intrasteric Regulation 125
- V. Summary and Perspectives 128
- References 128

CHAPTER

10

Myosin Light Chain PhosphataseFERENC ERDÖDI, MASA AKI ITO,
AND DAVID J. HARTSHORNE

- I. Introduction 131
 - A. Importance of Myosin Phosphorylation in Smooth Muscle 131
 - B. Classification of the Ser/Thr-Specific Protein Phosphatases 131
 - C. Subunit Structure and Regulation of Protein Phosphatases 132
- II. Smooth Muscle Myosin Phosphatase 133
 - A. Assay and Preparation 133
 - B. Properties of Phosphatases Isolated from Smooth Muscles 135
 - C. Phosphatases of Different Smooth Muscles 136
 - D. Isoforms of the Type 1 Catalytic Subunit 136
 - E. Targeting Subunits 138
- III. Phosphatase Inhibitors 139
- IV. Summary 140
- References 140

CHAPTER

11

Calcium/Calmodulin-Dependent Protein Kinase IIHAROLD A. SINGER, S. THOMAS ABRAHAM,
AND CHARLES M. SCHWORER

- I. Introduction 143
- II. Structural Properties of Calmodulin-Kinase II 143
 - A. Holoenzyme and Subunit Structure 143
 - B. Tissue Distribution of Calmodulin-Kinase II Subunits 145
 - C. Related Calmodulin-Kinases (Calmodulin-Kinases I, III, IV, V) 146
- III. Regulation of Calmodulin-Kinase II Activity 146
 - A. Activation by Ca^{2+} /Calmodulin 146
 - B. Autophosphorylation of Calmodulin-Kinase II 147
 - C. Substrate Specificity 148
- IV. Activation and Autophosphorylation of Calmodulin-Kinase II *in Situ* 148
- V. Calmodulin-Kinase II Isozymes in Smooth Muscle 149

A. Caldesmon Kinase 149

B. Arterial Smooth Muscle Calmodulin-Kinase II 149

- VI. Potential Functions of Calmodulin-Kinase II in Smooth Muscle 150
- VII. Summary 152
- References 152

CHAPTER

12

Protein Kinase C

HAROLD A. SINGER

- I. Introduction 155
- II. Properties of Protein Kinase C Isozymes 155
 - A. Structural Properties 155
 - B. Regulation of Protein Kinase C Activity 156
 - C. Tissue Distribution 157
 - D. Subcellular Localization 157
- III. Expression of Protein Kinase C Isozymes in Smooth Muscle 158
- IV. Role of Protein Kinase C in Regulating Smooth Muscle Contraction 160
 - A. Protein Kinase C Activation in Smooth Muscle 160
 - B. Phorbol Ester-Stimulated Contractile Responses 161
 - C. Protein Kinase C-Dependent Activation of Mitogen-Activated Protein Kinase 162
- V. Summary 163
- References 163

CHAPTER

13

Mitogen-Activated Protein Kinase

LEONARD P. ADAM

- I. Introduction 167
- II. Measurement of Mitogen-Activated Protein Kinase Activity in Smooth Muscle 168
 - A. Measurement of Phosphotyrosine Content in Mitogen-Activated Protein Kinase 168
 - B. "In-Gel" Kinase Assay 168
 - C. Kinase Assay Using a Mitogen-Activated Protein Kinase-Specific Substrate 169
- III. Mitogen-Activated Protein Kinase Cascade 169
 - A. Activation by Insulin, Growth Factors, and Pharmacological Agents 169

- B. Mitogen-Activated Protein Kinase Cascade Members, Including the Protein Kinases *raf*, MEKK, and MEK 170
- C. G-Protein Activation of Mitogen-Activated Protein Kinase 170
- D. Substrate Specificity of Mitogen-Activated Protein Kinase 170
- IV. Evidence for Mitogen-Activated Protein Kinase in the Contractile Phenotype of Smooth Muscle 171
 - A. Phosphorylation of Caldesmon 171
 - B. Several Elements of the Mitogen-Activated Protein Kinase Cascade Are Present in Contractile Smooth Muscle 172
 - C. Mitogen-Activated Protein Kinase Activity in Contractile Smooth Muscle 172
 - D. Cytochemical Localization of Mitogen-Activated Protein Kinase in Arterial Smooth Muscle 174
- V. Comparison of Mitogen-Activated Protein Kinase Activation in Contractile versus Proliferative Smooth Muscle 175
- VI. Summary 175
References 176

MOTILE SYSTEMS

CHAPTER

14

In Vitro Motility Assays with Smooth Muscle Myosin

JAMES R. SELLERS

- I. Introduction 181
- II. Description of Equipment 182
- III. Assay Procedure 183
 - A. Preparation of Rhodamine Phalloidin-Labeled Actin Filaments 183
 - B. Preparation of Coverslip Surfaces 184
 - C. Construction of Flow Cells 184
 - D. Preparation of the Slide 185
 - E. Quality Control 185
- IV. Quantitation and Presentation of Results 186
 - A. Velocity Determination 186
 - B. Presentation of Results 186
- V. Effects of Phosphorylation 187
- VI. Mechanical Experiments 188
- VII. Effect of Light Chain Removal 189
- VIII. Summary and Perspectives 190
References 190

CHAPTER

15

Permeabilized Smooth Muscle

GABRIELLE PFITZER

- I. Introduction 191
- II. Permeabilization Protocols 191
 - A. Triton Skinning 192
 - B. Permeabilization with Saponin 192
 - C. Permeabilization with β -Escin and α -Toxin 193
- III. Probing the Phosphorylation Theory in Triton Skinned Smooth Muscle 193
 - A. Calmodulin Is Essential for Contraction 193
 - B. Activation of Contraction by Phosphorylation of Myosin Light Chain 194
 - C. The "Latch" State in Skinned Fibers 194
- IV. Kinetic Investigations in Permeabilized Smooth Muscle Using Caged Compounds 195
- V. Modulation of Ca^{2+} Sensitivity of Contraction 195
 - A. In Triton Skinned Preparations 195
 - B. In β -Escin- and α -Toxin-Permeabilized Smooth Muscle 196
- VI. Studies on the Ca^{2+} Release from Intracellular Stores in Permeabilized Smooth Muscle 196
- VII. Conclusions 197
References 197

CALCIUM MOVEMENTS

CHAPTER

16

Calcium Channels and Potassium Channels

HARM J. KNOT, JOSEPH E. BRAYDEN, AND MARK T. NELSON

- I. Introduction 203
 - A. Measuring Ion Channels in Smooth Muscle 204
 - B. Regulation of Vascular Arterial Tone by Membrane Potential 205
 - C. Regulation of Smooth Muscle Membrane Potential by Potassium Channels 207

- II. Properties of Calcium and Potassium Channels 207
 - A. Voltage-Dependent ("L-Type") Calcium Channels 207
 - B. Voltage-Dependent Potassium (K_V) Channels 208
 - C. Calcium-Activated Potassium (K_{Ca}) Channels 209
 - D. ATP-Sensitive Potassium (K_{ATP}) Channels 209
 - E. Inward Rectifier Potassium (K_{IR}) Channels 210
- III. Pharmacology of Calcium and Potassium Channels in Smooth Muscle 210
 - A. Pharmacology of "L-Type" Calcium Channels 210
 - B. Pharmacology of K_V Channels 211
 - C. Pharmacology of K_{Ca} Channels 211
 - D. Pharmacology of K_{ATP} Channels 212
 - E. Pharmacology of K_{IR} Channels 212
- IV. Physiology of Calcium and Potassium Channels in Smooth Muscle 212
 - A. Physiological Role of "L-Type" Calcium Channels 212
 - B. Physiological Roles of K_V Channels 213
 - C. Physiological Roles of K_{Ca} Channels 213
 - D. Physiological Roles of K_{ATP} Channels 214
 - E. Physiological Roles of K_{IR} Channels 215
- V. Conclusions 217
- References 217

CHAPTER

17

Molecular Biology and Expression of Smooth Muscle L-Type Calcium Channels

FRANZ HOFMANN AND NORBERT KLUGBAUER

- I. Introduction 221
- II. Subunit Structure and Genes of the High Voltage-Activated Calcium Channel 221
 - A. Subunit Composition 221
 - B. The α_1 Subunit Genes 221
 - C. The α_2/δ Subunit Gene 222
 - D. The β Subunit Genes 223
- III. The Smooth Muscle L-Type Calcium Channel α_1 Subunit 223
 - A. The Voltage-Sensing Parts 223
 - B. The Selectivity Filter and Pore Region 224
 - C. Coupling to Intracellular Proteins 224

- D. The Receptor Sites for Calcium Channel Blockers 224
- IV. Functional Interaction of the Calcium Channel Subunits 225
- V. Hormonal Regulation of the Smooth Muscle Calcium Channel 225
- References 226

CHAPTER

18

Electromechanical and Pharmacomechanical Coupling

CHRISTOPHER M. REMBOLD

- I. Introduction 227
- II. Historical Background 227
- III. Electromechanical Coupling 229
 - A. Potential-Dependent Ca^{2+} Influx 229
 - B. Agonist-Dependent Depolarization 229
 - C. cGMP-Induced Reductions in $[Ca^{2+}]_i$ 229
- IV. Pharmacomechanical Coupling 230
 - A. Pharmacomechanical Coupling by Changing $[Ca^{2+}]_i$ 230
 - B. Pharmacomechanical Coupling by Regulation of the $[Ca^{2+}]_i$ Sensitivity of Myosin Light Chain Phosphorylation 232
- V. Regulation of Contractile Force 235
- VI. Relative Importance of the Electromechanical and Pharmacomechanical Contractile Mechanisms 236
- VII. Summary and Perspectives 236
- References 237

CHAPTER

19

Calcium Pumps

LUC RAEYMAEKERS AND FRANK WUYTACK

- I. Introduction 241
- II. Role of Ca^{2+} Pumps in the Regulation of Cytosolic Ca^{2+} 242
- III. General Properties of Ca^{2+} Pumps and Their Regulators 242
 - A. General Properties of Ca^{2+} Pumps 242
 - B. Ca^{2+} Pump Isoforms 244
 - C. Structure and Function of Phospholamban 244

- IV. Expression of Ca²⁺ Pumps and Phospholamban in Smooth Muscle Cells 245
 - A. Expression of the Endoplasmic Reticulum Ca²⁺ Pump 245
 - B. Expression of Phospholamban 246
 - C. Expression of the Plasma Membrane Ca²⁺ Pump 247
- V. Regulation of the Serca-Type Ca²⁺ Pumps in Smooth Muscle Cells 247
 - A. Regulation by Cyclic Nucleotide-Dependent Protein Kinases 247
 - B. Regulation of the SERCA Pump by Ca²⁺/Calmodulin-Dependent Protein Kinase 248
- VI. Regulation of the PMCA-Type Ca²⁺ Pumps in Smooth Muscle Cells 248
 - A. Regulation of the Plasmalemmal Ca²⁺ Pump by Calmodulin 248
 - B. Regulation of the Plasmalemmal Ca²⁺ Pump by Phospholipids 249
 - C. Regulation of the Plasmalemmal Ca²⁺ Pump by Protein Kinases 249
 - D. Regulation of the Plasmalemmal Ca²⁺ Pump by Hormones and Other Signals 250
- VII. Ca²⁺ Pumps in Pathological Conditions 251
 - References 251

SIGNAL TRANSDUCTION

CHAPTER

20

The Nitric Oxide–Cyclic GMP Signaling System

THOMAS M. LINCOLN, TRUDY L. CORNWELL,
PADMINI KOMALAVILAS, LEE ANN MACMILLAN-CROW,
AND NANCY BOERTH

- I. Mechanisms of Nitric Oxide Signaling in Vascular Cells 257
- II. Mechanism of cGMP-Evoked Relaxation of Vascular Smooth Muscle 259
 - A. Ca²⁺ Sequestration 260
 - B. Activation of Ca²⁺-Activated K⁺ Channels (BK Channels) 260
 - C. Inhibition of Phospholipase C 261
- III. Role of cGMP-Dependent Protein Kinase in the Nitric Oxide–cGMP Signaling Pathways in Smooth Muscle Cells 262
- IV. Activation of cGMP-Dependent Protein Kinase by cAMP in Smooth Muscle 264
- V. Protein Substrates for cGMP-Dependent Protein Kinase 265
- VI. Role of Nitric Oxide and cGMP in Vascular Smooth Muscle Cell Proliferation and Differentiation 266
- VII. Summary 267
 - References 267

CHAPTER

21

Inositol

1,4,5-Trisphosphate Production

MICHAEL BÁRÁNY AND KATE BÁRÁNY

- I. Introduction 269
- II. Analysis of Inositol Phosphates and Phospholipids 269
 - A. Separation and Detection of Inositol Phosphates 271
 - B. Quantification of Inositol and Phosphate 271
 - C. Determination of Inositol Phospholipids 271
- III. Enzymes Involved in the Turnover of Phosphate in Phosphoinositides 271
 - A. Kinases 271
 - B. Phosphatases 272
- IV. Phosphoinositide-Specific Phospholipase C 273
 - A. Isozymes 273
 - B. Activation 273
 - C. Pathways for Activation 275
 - D. Inhibition 276
- V. Inositol 1,4,5-Trisphosphate and Contraction 277
 - A. Compartmentalization 278
- VI. Relationship between Smooth Muscle Stimulation, Inositol 1,4,5-Trisphosphate Release, and Rise in Intracellular Ca²⁺ 278
- VII. Inositol Tetrakisphosphate 278
- VIII. Diacylglycerol 279
 - A. Metabolism of Diacylglycerol 279
 - B. Smooth Muscle Stimulation and Diacylglycerol Accumulation 279
 - C. Role of Protein Kinase C in Smooth Muscle 279
- IX. Summary and Perspectives 280
 - References 280

CHAPTER

22

**Protein Tyrosine Phosphorylation
and Regulation of Intracellular
Calcium in Smooth Muscle Cells**

JOSEPH DI SALVO, NIHAL KAPLAN,
AND LORI A. SEMENCHUK

- I. Introduction 283
 - A. Underlying Hypothesis 283
- II. Cellular Functions of Protein Tyrosine Phosphorylation 283
 - A. Overview 283
 - B. Cellular Ca^{2+} ($[\text{Ca}^{2+}]_i$) 285
- III. Protein Tyrosine Phosphorylation and $[\text{Ca}^{2+}]_i$ in Smooth Muscle 285
 - A. Vanadate-Induced Contraction in Intact *Taenia coli* 285
 - B. Receptor Activation, Tyrosine Kinase Activity, and $[\text{Ca}^{2+}]_i$ in Cultured Vascular Smooth Muscle Cells 287
 - C. Smooth Muscle Activation and Enhanced Protein Tyrosine Phosphorylation: *rasGAP* Is a Substrate 289
- IV. Summary, Working Model, and Future Directions 291
References 292

CHAPTER

23

**Cyclic ADP-Ribose and
Calcium Signaling**

ANTONY GALIONE AND JASWINDER SETHI

- I. Introduction 295
- II. Identification of Cyclic ADP-Ribose as a Ca^{2+} Mobilizing Agent 295
 - A. The Discovery of cADPR as a Ca^{2+} Mobilizing Molecule 295
 - B. Structural Determination of cADPR 296
- III. Cyclic ADP-Ribose Metabolism 297
 - A. Measurements of cADPR in Tissues 297
 - B. ADP-Ribosyl Cyclases 297
 - C. cADPR Hydrolases 298
 - D. CD38 and Homologous Proteins 298
 - E. Regulation of cADPR Synthesis 299
- IV. Mechanism of Cyclic ADP-Ribose-Induced Ca^{2+} Release 299
 - A. Pharmacology of cADPR-Induced Ca^{2+} Release 299
 - B. The Identity of the cADPR Receptor 300

- C. Regulation of cADPR-Induced Ca^{2+} Release by Calmodulin 300
- V. Cyclic ADP-Ribose-Mediated Ca^{2+} Release in Mammalian Cells 300
 - A. Cardiac Muscle 301
 - B. Neurons 301
 - C. Pancreatic Cells 301
 - D. Possible Roles of cADPR in the Regulation of Smooth Muscle Contraction 302
- References 304

CHAPTER

24

**Enzyme Translocations during
Smooth Muscle Activation**

RAOUF A. KHALIL AND KATHLEEN G. MORGAN

- I. Introduction 307
- II. Methods of Study 308
 - A. Biochemical Approaches 309
 - B. Digital Imaging Microscopy 309
 - C. Pharmacological Approaches 310
- III. Evidence for Translocation of Enzymes during Smooth Muscle Activation 311
 - A. Protein Kinase C 311
 - B. Mitogen-Activated Protein Kinase 312
 - C. Other Kinases 313
- IV. Mechanisms of Translocation 314
 - A. Conformation-Induced Changes in Hydrophobicity 314
 - B. Lipid Modification 314
 - C. Phosphorylation 314
 - D. Targeting Sequences 315
- V. Kinase Cascades in Smooth Muscle Contraction 315
- VI. Summary and Perspectives 316
References 316

CONTRACTION AND RELAXATION

CHAPTER

25

**Protein Phosphorylation during
Contraction and Relaxation**

MICHAEL BÁRÁNY AND KATE BÁRÁNY

- I. Introduction 321
- II. Quantification of Protein
