Rutherford's Vascular Surgery and Endovascular Therapy

9TH EDITION

Anton N. Sidawy, MD, MPH

Professor and Lewis B. Saltz Chair
Department of Surgery
George Washington University
Washington, District of Columbia
Bruce A. Perler, MD, MBA

Julius H. Jacobson, II, MD, Professor
Vice Chair for Clinical Operations and Financial Affairs
Department of Surgery
The Johns Hopkins University School of Medicine
Baltimore, Maryland
Associate Executive Director for Vascular Surgery
American Board of Surgery
Philadelphia, Pennsylvania

Society for Vascular Surgery

Preface

Video Contents

Common Abbreviations

Volume 1
Section 1 Basic Science

Chapter 1 Epidemiology and Research Methodology

Abstract
Epidemiology
Clinical Research Methods
Outcomes Analysis
Outcomes Translational Research
References

Chapter 2 Embryology and Developmental Anatomy

Abstract
Formation of Embryonic Blood Vessels
Development of the Descending (Thoracic and Abdominal) Aorta
Development of the Limbs
Development of the Venous System
References

Chapter 3 Vessel Wall Biology

Abstract
Arterial Wall Anatomy
Arterial Wall System
Hemodynamics and Vascular Wall Biology
Vein Wall Anatomy
Vein Wall System
Lymphatic Wall Anatomy

Lymphatic Wall System

References

Chapter 4 Atherosclerosis

Atherosclerotic Lesions

Theories of Pathogenesis

Atherosclerosis as a Chronic Inflammatory Disease

Localization of Atherosclerosis

Progression/Regression of Plaques

Thrombotic Complications of Atherosclerosis

Identification of Vulnerable Lesions

References

Chapter 5 Intimal Hyperplasia

Response of the Artery to Injury

Response of Vein to Injury

Healing Response of the Prosthetic Graft

Intimal Hyperplasia and Dialysis Access

Conclusion

References

Chapter 6 Ischemia-Reperfusion

Abstract

Pathophysiology of Ischemia-Reperfusion Injury
Clinical Manifestations of Ischemia-Reperfusion Injury

Future Directions in Ischemia-Reperfusion Injury

References

Chapter 7 Arteriogenesis and Angiogenesis

Neovascularization

Arteriogenesis

Angiogenesis

Role of Micrornas in Neovascularization

Clinical Trials

References

Chapter 8 Arterial Hemodynamics

Basic Concepts

Arterial Stenosis

References

Chapter 9 Venous Pathophysiology

Introduction

Basic Considerations

Thrombophlebitis

Conclusion

References

Chapter 10 Lymphatic Pathophysiology
Section 2 Atherosclerotic Risk Factors

Chapter 11 Atherosclerotic Risk Factors
   Abstract
   Epidemiology
   Biologic Effects of Smoking on the Vasculature
   Nonvascular Clinical Effects
   Vascular Clinical Effects
   Smoking Cessation
   References

Chapter 12 Atherosclerotic Risk Factors
   Epidemiology
   Classification of Diabetes
   Diabetes and Vascular Disease
   Pathophysiology of Vascular Disease in Diabetes
   Vascular Evaluation of Patients With Diabetes
   Treatment of Patients With Diabetes and Peripheral Artery Disease
Summary and Future Directions

References

Chapter 13 Atherosclerotic Risk Factors

Abstract

Historical Perspective

Physiology and Metabolism of Lipids

Pathophysiology of Atherosclerosis

Diagnosis of Atherogenic Lipid Disorders

Evolution of the Guidelines for Management and Therapeutic Goals for Lipoprotein Disorders

Clinical Trials of the Management of Dyslipidemia in Peripheral Arterial Disease

Nonpharmacologic Therapy for Dyslipidemia

Pharmacologic Therapy for Dyslipidemia

References

Chapter 14 Atherosclerotic Risk Factors

Epidemiology

Diagnosis

Pathologic Mechanisms of Hypertension and Atherosclerosis

Management

References

Chapter 15 Atherosclerosis Risk Factors

Abstract
Chapter 16 Less Commonly Considered Causes of Atherosclerosis

Abstract
The Atherosclerotic Lesion
Hyperlipidemia
Diet
Infection
Environmental Toxins
Summary
References

Chapter 17 International and Ethnic Trends in Vascular Disease

Abstract
International Trends
Ethnic Trends
References
Section 3 Clinical and Vascular Laboratory Evaluation

Chapter 18 Clinical Evaluation of the Arterial System

Abstract

Overview of the Clinical Evaluation

History in Patients With Arterial Disease

Physical Examination in Patients With Arterial Disease

The Ulcerated Leg

References

Chapter 19 Clinical Evaluation of the Venous and Lymphatic Systems

Introduction

Anatomic Considerations

The Clinical Evaluation

References

Chapter 20 Vascular Laboratory

Doppler Ultrasonography

Pressure Measurements

Plethysmography

Other Methods

References
Chapter 21 Vascular Laboratory

Instrumentation and Basic Concepts

Duplex Surveillance

References

Chapter 22 Vascular Laboratory

Ambulatory Venous Pressure

Plethysmography

Selective Use of Venous Physiologic Testing

References

Chapter 23 Vascular Laboratory

Abstract

Normal B-Mode Imaging Findings

Normal Flow Patterns in Veins

Diagnosis of Deep Vein Thrombosis

Calf Vein Thrombosis

Iliac Vein and Inferior Vena Cava

Diagnosis of Upper Extremity Deep Vein Thrombosis

Limited or Point-of-Care Ultrasound Examinations

Determination of Thrombus Age

Novel Ultrasound Techniques: Elastography

Determining the Duration of Therapy for Acute Deep Vein Thrombosis

Diagnosis of Recurrent Thrombosis

Superficial Veins
Evaluation for Chronic Venous Disease: Venous Insufficiency

Perforating Veins

References

Section 4 Vascular Imaging

Chapter 24 Radiation Safety

Abstract

Types of Radiation

Measurement

Biologic Effects of Radiation

Exposure and Recommended Limits

Principles of Radiation Protection

Radiation Safety: Diagnostic Procedures

Radiation Safety: Endovascular Procedures

Radiation and the Endovascular Surgeon

Radiation and Pregnancy

References

Chapter 25 Arteriography

Abstract

Equipment

Techniques

Clinical Applications

Limitations and Risks
Chapter 26 Venography

Basic Principles
Clinical Applications
Iliac Vein Assessment and Inferior Venacavography
Venography During Treatment of Iliocaval Stenosis
Diagnostic Venography of Pelvic Congestion Syndrome
Venography for Varicoceles
Renal Venography
Diagnostic Angiography of Mesenteric or Portal Venous Thrombosis
Diagnostic Venography of Budd-Chiari Syndrome
Upper Extremity Venography
Central Thoracic Venography
Pulmonary Arteriography
General Limitations and Risks of Venography
Future Advances
References

Chapter 27 Computed Tomography

Basic Principles
Clinical Application
Limitations and Risks
Common Artifacts
Clinical Applications

Limitations and Risks

Future Advances

References

Chapter 31 The Future of Imaging for Endovascular and Open Surgery

Background

X-Ray Imaging and Hybrid Operating Rooms

Endovascular Navigation and Catheter Robotics

The Future Hybrid Operating Suites

References

Section 5 Perioperative Care

Chapter 32 Preoperative Evaluation and Management

Abstract

General Preoperative Risk Assessment

Preoperative Medical Versus Interventional Therapy for Cardiac Disease

Ethical and Legal Concerns/Frailty Assessment

References

Chapter 33 Intraoperative Management

Anesthesia

Intraoperative Monitoring
Section 6 Bleeding and Clotting

Chapter 36 Normal Coagulation

Abstract

Introduction

Procoagulant, Anticoagulant, and Fibrinolytic Proteins, Inhibitors, and Receptors

Connectivity and Dynamics of Blood Coagulation

Blood Coagulation Monitoring

Acknowledgment

References

Chapter 37 Coagulopathy and Hemorrhage

Abstract

Diagnosis and Preoperative Screening for Bleeding Disorders

Inherited Coagulopathies

Acquired Coagulopathies

Drug-Induced Coagulopathies

Hypothermia

Acidosis
Chapter 38 Hypercoagulable States

Pathophysiology

Congenital Hypercoagulability

Acquired Hypercoagulability

Evaluation of the Patient With Suspected Thrombophilia

References

Chapter 39 Anticoagulant Drugs

Introduction

References

Chapter 40 Antiplatelet Agents

Introduction

Normal Platelet Function and Platelet Activation

Clinical Use of Antiplatelet Agents in Vascular Disease

References

Chapter 41 Thrombolytic Agents

Abstract
Section 7 Complications

Chapter 42 Systemic Complications

Abstract

Epidemiology

The Pathophysiology of Perioperative Myocardial Infarction

Preoperative Cardiac Evaluation

Class I

Class III: No Benefit

Medical Prophylaxis

Treatment

References

Chapter 43 Respiratory Complications

Preoperative Risk Stratification

Perioperative Risk Reduction

Clinical Manifestations

Management Strategies

References
Chapter 44 Systemic Complications

Abstract
Renal Anatomy
Renal Function
Acute Kidney Injury After Vascular and Endovascular Procedures
Ischemic Injury to the Kidney
Altered Renal Function During Aortic Surgery
Acknowledgment
References

Chapter 45 Neurologic Complications

Structure of a Peripheral Nerve
Causes of Nerve Damage
Diagnostic Evaluation
General Principles of Treatment
Trauma
Specific Nerve Injuries
Spinal Cord and Lumbosacral Plexus Injury
Femoral Nerve Injury
Saphenous Nerve and Sural Nerve Injury
Tibial and Peroneal Nerve Injury
Other Nerves
References

Chapter 46 Graft Thrombosis
Abstract
Prevention: Intraoperative Graft Assessment
Graft Thrombosis: Pathogenesis
Graft Thrombosis: Therapeutic Approach
Acknowledgment
References

Chapter 47 Graft Infection
Abstract
Incidence
Classification
Pathogenesis
Diagnosis
Surgical Treatment and Outcomes
References

Chapter 48 Anastomotic Aneurysms
Incidence and Anatomic Location
Pathogenesis
Clinical Diagnosis
History and Physical Examination
Surgical Treatment
Outcomes
References
Chapter 49 Local Complications

Primary Aortoenteric Fistula
Secondary Aortoenteric Fistula
Clinical Presentation
Diagnosis
Treatment
Results and Conclusions
References

Chapter 50 Local Endovascular Complications and Their Management

Abstract:
Introduction
Groin Hematoma
Retroperitoneal Hematoma
Arteriovenous Fistula
Pseudoaneurysm
Axillary and Brachial Access Complications
Percutaneous Closure Device Complications
Bleeding Complications
Ischemic Complications
Procedure-Specific Complications
Other Complications of Endovascular Procedures
References
Chapter 51 Venous Complications

Abstract

Incidence of Venous Complications

Conclusions

References

Chapter 52 Local Complications

Abstract

Post-Bypass Edema

Lymphatic Fistula

Lymphocele

Chylous Ascites

Thoracic Duct Fistula

Chylothorax

References

Section 8 Technique

Chapter 53 Thoracic and Thoracoabdominal Vascular Exposure

Abstract

Exposure of the Ascending Aorta and Aortic Arch

Exposure of the Distal Aortic Arch and Descending Thoracic Aorta

Exposure of the Thoracoabdominal Aorta

Exposure of the Distal Descending Thoracic Aorta and Visceral Aorta
Chapter 54 Abdominal Vascular Exposures

Abstract
Anatomic Considerations
Exposure of Major Abdominal Veins
References

Chapter 55 Cerebrovascular Exposure

Abstract
General
Exposure of the Carotid Artery for Endarterectomy
Retrojugular Approach
Posterior Approach for Carotid Endarterectomy
Proximal Exposure for Carotid Endarterectomy
Reoperative Exposure for Carotid Stenosis
Exposure for Subclavian Carotid Interventions
Vertebral Artery Exposure
Exposure of the V2 Segment of the Vertebral Artery
Posterior Exposure of the Suboccipital Vertebral Artery (V4) Segment
Tips

Chapter 56 Lower Extremity Arterial Exposure

Abstract
Introduction
Chapter 57 Upper Extremity Vascular Exposure

Abstract

Introduction

Exposure of Arteries Within the Thorax

Exposure of Veins Within the Thorax

Exposure of Vessels Within the Thoracic Outlet

Exposure of the Arm Vessels

References

Chapter 58 Spinal Operative Exposure

Abstract

Clinical Presentation, Diagnostic Evaluation, and Risk Assessment
Chapter 62 Laparoscopic and Robotic Aortic Surgery

Abstract

Introduction

Total Laparoscopic Aortic Surgery

Hand-Assisted Laparoscopic Aortic Surgery

Totally Robotic Aortic and Robot-Assisted Procedures

Published Series

Perioperative Outcomes

Summary
Section 9 Grafts and Devices

Chapter 63 Autogenous Grafts

Abstract
Histology
Anatomy
Vein Graft Preparation
Autogenous Vein Graft Configurations
Etiology of Vein Graft Failure
Prevention of Vein Graft Failure
References

Chapter 64 Prosthetic Grafts (Heparin-Bonded and Spiral Grafts)

Abstract
Introduction
Basic Principles
Clinical Applications
Limitations and Risks
Future Advances
References

Chapter 65 Biologic Grafts
Chapter 66 Bioengineered Vascular Grafts

Abstract
Basic Principles
Clinical Experience
Limitations and Risks
Future Advances
References

Chapter 67 Nonaortic Stents and Stent Grafts

Abstract
Historical Background
Stent-Vessel Interaction
Stent Types and Characteristics
Selection of Stent
Failure Modes
New Developments
Future Developments
References
Chapter 68 Novel and Evolving Aortic Endovascular Devices

    Introduction
    Thoracic Aorta
    Abdominal Aorta
    Future Directions
    Conclusion
    References

Section 10 Abdominal Aortic And Iliac Aneurysms

Chapter 69 Arterial Aneurysms

    Abstract
    General Considerations
    Historical Perspective
    Aneurysm Classification
    Multiple Aneurysms
    References

Chapter 70 Aortoiliac Aneurysms

    History
    Definitions
    Epidemiology
    Pathophysiology
    Diagnosis

31
Screening and Surveillance Recommendations

Medical Therapy

Indications for Intervention

Future Directions

References

Chapter 71 Abdominal Aortic Aneurysms

Indication for Open Repair

Preoperative Assessment and Planning

Operative Technique

Transperitoneal Repair

Retroperitoneal Repair

Anatomic Considerations

Intraoperative Management

Postoperative Complications

Outcomes

Special Circumstances

References

Chapter 72 Aortoiliac Aneurysms

Abstract

Graft Types

Randomized Trials of Endovascular Aneurysm Repair Versus Open Repair

Endovascular Aneurysm Repair Compared With Medical Management
Endovascular Aneurysm Repair in Ruptured Abdominal Aortic Aneurysms

Comparison of Different Stent Grafts

Complications of Endovascular Aneurysm Repair

Follow-Up

Endovascular Repair of the Juxtarenal Aorta

Endovascular Repair of Common Iliac and Internal Iliac Artery Aneurysms

Cost of Endovascular Aneurysm Repair

References

Chapter 73 Endovascular Aneurysm Repair Techniques

Abstract

Characteristics of Abdominal Aortic Stent Grafts

Anesthesia, Access, and Imaging

Evar Deployment

EVAR Troubleshooting

Selected Key References

Chapter 74 Ruptured Aortoiliac Aneurysms and Their Management

Terminology and History

Epidemiology

Pathophysiology of Aortic Rupture

Clinical Features

Initial Management Strategies

Operative Strategies: Endovascular Repair
Chapter 75 Isolated Iliac Artery Aneurysms and Their Management

Introduction
Pathogenesis
Natural History
Presentation
Diagnosis
Management
Conclusions
References

Section 11 Thoracic and Thoracoabdominal Aortic Aneurysms and Dissections

Chapter 76 Thoracic and Thoracoabdominal Aortic Aneurysms

Introduction
The Thoracic Aorta: Anatomy and Epidemiology of TAA and TAAA
Pathogenesis
Etiology
Anatomic Classification
Chapter 77 Thoracic and Thoracoabdominal Aneurysms

Abstract

Pathology

Degenerative

Inheritable

Trauma, Mycotic, Vasculitis

Anatomic Classification

Indications for Surgical Treatment

Patient Evaluation

Imaging

Informed Consent

Surgical Repair

Anesthesia

Patient Positioning

Surgical Exposure

Aneurysm Repair
Impact of Endovascular Treatment
Postoperative Care
Outcomes
Spinal Cord Ischemia
Pulmonary Complications
Mortality
Renal Function
Effect of Surgical Technique on Morbidity
Long-Term Survival and Quality of Life
References

Chapter 78 Thoracic and Thoracoabdominal Aneurysms
Abstract
Approved Devices for Thoracic Endovascular Aortic Repair
Planning
Thoracic Endovascular Aortic Repair for Thoracic Aneurysms
Hybrid Endovascular Repair for Thoracoabdominal Aneurysms
Investigational Devices for Thoracoabdominal Aortic Aneurysms
Investigational Devices for Aortic Arch
References

Chapter 79 Thoracic and Thoracoabdominal Aneurysms
Abstract
Introduction
Indications
Devices
Chapter 80 Fenestrated and Branched Endograft Treatment of Juxtarenal, Paravisceral, Thoracoabdominal, and Aortic Arch Aneurysms

Abstract

History of Fenestrated and Branched Endovascular Aortic Aneurysm Repair

Definitions

Overview of Current Devices Based on Aneurysm Location and Extent

Case Planning and Sizing

Patient Selection and Preoperative Evaluation

Operative Technique

Outcomes of Fenestrated and Branched Repair

Surveillance Recommendations After Fenestrated and Branched Repair

Practice and Regulatory Issues

References
Chapter 81 Aortic Dissection

Classification
Epidemiology
Pathologic Anatomy of Acute Aortic Dissection
Pathogenesis of Malperfusion Syndromes
Clinical Presentation
Diagnostic Evaluation
Treatment of Type B Dissection
Natural History and Follow-Up
References

Chapter 82 Penetrating Aortic Ulcers

Abstract
Introduction
Pathophysiology
Incidence
Clinical Presentation
Other Aortic Pathologies Associated With Penetrating Aortic Ulcer
Diagnostic Imaging
Treatment
Operative Repair
Endovascular Repair
Complications Associated With Repair
Summary
Section 12 Peripheral and Splanchnic Aneurysms

Chapter 83 Lower Extremity Aneurysms

Femoral Artery Aneurysms
Persistent Sciatic Artery Aneurysm
Popliteal Artery Aneurysms
Conclusion
Tibial Artery and Pedal Artery Aneurysms
References

Chapter 84 Upper Extremity Aneurysms

Abstract
Arch Vessel Aneurysms
Aneurysm of Aberrant Subclavian Artery and Kommerell Diverticulum
Axillary Artery Aneurysms
Brachial Artery Aneurysms
References

Chapter 85 Splanchnic Artery Aneurysms

Abstract
Incidence and Etiology
General Treatment Principles
Surgical and Endovascular Techniques
Section 13 Cerebrovascular Diseases

Chapter 86 Cerebrovascular Disease

Abstract
Background
Stroke—Background/Introduction
Stroke—Prevalence/Incidence
Declining Prevalence/Incidence of Stroke
Ischemic Stroke—Epidemiology
Ischemic Stroke—Natural History
Transient Ischemic Attack—Background/Introduction
Transient Ischemic Attack—Prevalence
Transient Ischemic Attack—Natural History
Extracranial Carotid Artery Atherosclerosis—Background
Extracranial Carotid Artery Atherosclerosis—Epidemiology
Extracranial Carotid Artery Atherosclerosis—Natural History
Additional Topics
References

Chapter 87 Cerebrovascular Disease

Abstract
Mechanism of Stroke in Carotid Atherosclerosis
Stable Versus Unstable Carotid Plaques
Histomorphology of the Unstable Carotid Plaque
Biomechanics of the Unstable Carotid Plaque
Noninvasive Identification of the Unstable Carotid Plaque
Two-Dimensional B-Mode Imaging
Ultrasonographic Virtual Histology
Three-Dimensional Ultrasonography
Contrast Enhanced Ultrasonography
Plaque Strain Measurement
Intravascular Ultrasound
Magnetic Resonance Imaging for Histomorphology
Combined Magnetic Resonance Imaging and Ultrasonography for Biomechanics
Summary
References

Chapter 88 Cerebrovascular Disease

Duplex Ultrasound
Magnetic Resonance Imaging/Magnetic Resonance Angiography
Positron Emission Tomography-Computed Tomography (See Chapter 29)
Computed Tomography Angiography
Digital Subtraction Angiography
Transcranial Doppler
References

Chapter 89 Cerebrovascular Disease

Introduction

Treatment Options When Carotid Bifurcation Stenosis Is Identified

Best Medical Therapy

Estimating the Stroke Risk in A Particular Clinical Scenario

Patient-Specific Factors That Influence the Choice of Therapy

Evidence-Based Selection of Therapy

Societal Guidelines Regarding Carotid Revascularization and Stroke Prevention

Selecting the Appropriate Therapy for the Appropriate Patient

References

Chapter 90 Nonatherosclerotic Carotid Artery Disease and Its Management

Abstract

Carotid Stenosis After Radiotherapy

Recurrent Carotid Stenosis

References

Chapter 91 Carotid Endarterectomy

Abstract

Epidemiology

Indications for Carotid Endarterectomy

Preoperative Imaging
Chapter 92 Cerebrovascular Disease

Abstract

Background

Landmark Clinical Trials

Current Guidelines

Patient Selection

Anatomic Considerations

Preoperative Considerations

Technique

Perioperative Medications

Complications

Postoperative Surveillance
Chapter 93 Cerebrovascular Disease

Abstract
Carotid Artery Dissection
References

Chapter 94 Carotid Artery Aneurysms

Abstract
Definition
Historical Review
Epidemiology
Pathogenesis
Clinical Findings
Diagnostic Evaluation
Natural History
Treatment
Treatment Outcome
Medical Management
Special Considerations

Chapter 95 Carotid Body Tumors
Abstract

Introduction

Epidemiology and Etiology

Anatomy and Physiology

Pathology

Clinical Presentation

Diagnosis

Treatment

Preoperative Preparation

Surgical Technique

Positioning and Exposure

Resection of Tumor

Postoperative Care

Results

Conclusions

Selected Key References

Chapter 96 Unusual Carotid Artery Conditions

Abstract

Background

Carotid Sinus Syndrome/Carotid Sinus Hypersensitivity

Moyamoya Disease

Carotid Artery Kinks and Coils

Intracranial Vascular Stenosis
Chapter 97 Vertebral Artery Dissection and Other Conditions

Abstract
Pathogenesis and Anatomy
Disease Distribution
Patient Selection for Vertebral Artery Reconstruction
Vertebral Artery Reconstructive Procedures
Operative Results
Endovascular Therapy
Conclusion
References

Chapter 98 Brachiocephalic Artery Disease and Its Surgical Treatment

Abstract
Introduction
Anatomic Variants
Indications for Intervention in Occlusive Disease
Other Indications for Intervention
Diagnostic Evaluation
Revascularization
Upper Limb Ischemia
References

Chapter 101 Acute Ischemia

Abstract
Initial Management
Treatment Selection
Endovascular Treatment
Surgical Revascularization
Special Considerations
Upper Limb Ischemia
References

Chapter 102 Compartment Syndrome and Its Management

Abstract
Introduction
Pathogenesis of Compartment Syndrome
Clinical Etiologies
Clinical Presentation
Adjunctive Measures
Fasciotomy
Technique of Fasciotomy
Fasciotomy Wound Management
Outcomes
Chronic Exertional Compartment Syndrome
Chapter 103 Atheromatous Embolization and Its Management

Incidence
Pathogenesis
Risk Factors
Clinical Features
Diagnosis
Differential Diagnosis
Treatment
Summary
References

Section 15 Lower Extremity Chronic Arterial Disease

Chapter 104 Lower Extremity Arterial Occlusive Disease

Abstract

Epidemiology of Peripheral Arterial Disease

Anatomic Distribution of Disease and Clinical Correlations

Clinical Syndromes of Peripheral Arterial Disease, Staging and Natural History

References

Chapter 105 Lower Extremity Arterial Disease

Abstract
Medical Management
Decision Making for Revascularization
Treatment Guidelines According to Presentation
Risk Prediction Models
Angiogenesis for Peripheral Arterial Disease
References

Chapter 106 Aortoiliac Disease
Abstract
Pathology and Clinical Presentation
Diagnosis
Indications for Surgical Intervention
Surgical Treatment
Results
Isolated Profundaplasty
References

Chapter 107 Aortoiliac Disease
Femorofemoral Bypass
Axillofemoral Bypass
Obturator Bypass
Summary
References

Chapter 108 Aortoiliac Disease
Complications
Graft Surveillance
Treatment of Graft and Anastomotic Stenoses
Acknowledgment
References

Chapter 110 Infrainguinal Disease

Abstract
Introduction
Intermittent Claudication
Chronic Limb Threatening Ischemia
Factors Affecting Outcomes
Inflow Considerations
Outflow Considerations
Conclusions
References

Chapter 111 Lower Extremity Amputations

Abstract
Epidemiology
Indications for Amputation
Primary Amputation Versus Revascularization
Perioperative Evaluation
Amputation Level Selection
Rehabilitation Considerations
Chapter 112 Lower Extremity Amputations

Abstract

General Principles

Amputation Types

Midfoot and Hindfoot Amputations

Transtibial (Below-Knee) Amputation

Through-Knee Amputation

Transfemoral (Above-Knee) Amputation

Hip Disarticulation

Principles of Postoperative Care

Long-Term Survival

Functional Outcome

Reamputation

Complications

References

Section 16 Diabetic Foot and Its Management

Chapter 113 General Considerations of Diabetic Foot Ulcers

Abstract

Introduction

Epidemiology
Chapter 114 Diabetic Foot Abnormalities and Their Management

Abstract

Introduction

Peripheral Neuropathy

Biomechanics

Ischemia

Infection

The Diabetic Foot Ulcer

Charcot Neuroarthropathy

Other Important Considerations

Conclusions

References

Chapter 115 Wound Care

Abstract
Normal Wound Healing
Mechanisms of Abnormal Wound Healing in Chronic Wounds
Etiology of Ulceration
Clinical Presentation and Initial Evaluation
Properties and Categories of Wound Dressings
Venous Leg Ulcers
Diabetic Foot Ulcers
Ulcers Associated With Arterial Insufficiency
Specialized Techniques
References

Chapter 116 Podiatric Care
Abstract
The Specialty of Podiatry
Diabetes-Related Amputations

Treatment of Chronic Venous Disorders
Conclusion
Chapter 158 Chronic Venous Insufficiency

Abstract
Pathophysiology
Anatomy
Diagnostic Evaluation
Indications for Interruption
Operative Planning Options
Open Surgery
Percutaneous Ablation of Perforating Veins
References

Chapter 159 Chronic Venous Insufficiency

Pathogenesis
Diagnostic Evaluation
Treatment Selection
Surgical Treatment
Venous Valve Substitutes (Neovalve)
References

Chapter 160 Iliocaval Venous Obstruction

Abstract
Surgical Treatment of Iliocaval Venous Obstruction
Etiology
Chapter 161 Iliocaval Venous Obstruction

Abstract
Introduction
Pathology
Indications and Patient Selection for Iliocaval Venous Stenting
Diagnosis
Treatment
Outcomes
References
Section 24 Miscellaneous Venous Conditions

Chapter 162 Superior Vena Cava Occlusion and Management
 Abstract
  Etiology
  Clinical Presentation
  Diagnostic Evaluation
  Initial Treatments
  Indications for Interventional Treatment
  Endovenous Treatment
  Surgical Treatment
  Results
  Conclusions
  References

Chapter 163 Congenital Occlusion/Absence of Inferior Vena Cava
  Abstract
  Association With Deep Venous Thrombosis
  Embryogenesis
  Presentation
  Management
  Summary
