Shackelford's
SURGERY of the ALIMENTARY TRACT
Jeffrey B. Matthews, MD, FACS
Dallas B. Phemister Professor and Chairman of Surgery
The University of Chicago
Chicago, Illinois

Section III Pancreas, Biliary Tract, Liver, and Spleen

James W. Fleshman, MD, FACS
Seeger Professor and Chairman of Surgery
Baylor University Medical Center
Dallas, Texas

Volume 1

Steven R. DeMeester, MD, FACS
Division of Foregut and Minimally Invasive Surgery
The Oregon Clinic
Portland, Oregon
Section I Esophagus and Hernia

David W. McFadden, MD, MBA, FACS
Chairman, Department of Surgery
University of Connecticut
Surgeon-in-Chief
University of Connecticut Health
Farmington, Connecticut
Section II Stomach and Small Intestine

Volume 2

Jeffrey B. Matthews, MD, FACS
Dallas B. Phemister Professor and Chairman of Surgery
The University of Chicago
Chicago, Illinois
Section III Pancreas, Biliary Tract, Liver, and Spleen

James W. Fleshman, MD, FACS
Seeger Professor and Chairman of Surgery
Baylor University Medical Center
Dallas, Texas
Section IV Colon, Rectum, and Anus
Shackelford’s
SURGERY of the
ALIMENTARY TRACT

Charles J. Yeo, MD, FACS
Samuel D. Gross Professor and Chair
Department of Surgery
Sidney Kimmel Medical College at Thomas Jefferson University
Philadelphia, Pennsylvania

ELSEVIER
To my wife, Theresa, and my children, William and Scott; to my many mentors (some now deceased, many still alive) who have contributed to the science of surgery and to my education; to the many colleagues and friends whose contributions have made this eighth edition possible; and to those young alimentary tract surgeons and other health care professionals who will learn from these pages, move the field forward, and continue to improve our understanding of alimentary tract diseases.

CHARLES J. YEO

To my father, Tom DeMeester, whose passion for understanding the pathophysiology of esophageal and foregut disorders and applying this knowledge to better the lives of patients has been and remains an inspiration for me; to my many mentors who have helped me learn the craft of surgery and encouraged me to constantly strive for perfection; to my colleagues who give up many hours of their evenings, weekends, and vacations to contribute to abstracts, papers, and book chapters; to my fellows and residents who diligently train to be the next generation of expert surgeons; and to my family and friends who support me and graciously accept my long hours away at work caring for people in need of help.

STEVEN R. DEMEESTER

I would like to dedicate this book to all the past residents and fellows with whom I have worked and to thank them for making education such a wonderful part of my life; I hope this will help us to remember the times we’ve spent together taking care of complex patients and will encourage you to continue to pass on your knowledge to those whom you mentor.

JAMES W. FLESHMAN

To Dr. William Silen and my late grandfather, Dr. Benjamin M. Banks, for their wisdom; to the surgical residents and students, for their thirst for knowledge; and to my wife, Joan, and our boys, Jonathan, David, and Adam, for their love and support.

JEFFREY B. MATTHEWS

To my wife, Nancy, and my children, William, Hunter, and Nora; and to all of my mentors, colleagues, and patients who challenge and inspire me every day.

DAVID W. McFADDEN
# Shackelford's Surgery of the Alimentary Tract, Eighth Edition

Robert J. Cerfolio, MD, MBA, FACS, FACCP  
Professor of Surgery, Chief of Clinical Division Thoracic Surgery, Director of the Lung Cancer Service Line, New York University; Senior Advisor, Robotic Committee, New York, New York

Bradley J. Champagne, MD, FACS, FASCRS  
Chairman of Surgery, Fairview Hospital; Director of Services, DDSI West Region; Professor of Surgery, Cleveland Clinic Lerner School of Medicine; Medical Director, Fairview Ambulatory Surgery Center, Cleveland, Ohio

Parakrama Chandrasoma, MD, MRCP  
Chief, Surgical and Anatomic Pathology, Los Angeles County + University of Southern California Medical Center; Emeritus Professor of Pathology, Keck School of Medicine of the University of Southern California, Los Angeles, California

Alex L. Chang, MD  
Department of General Surgery, University of Cincinnati, Cincinnati, Ohio

Christopher G. Chapman, MD  
Assistant Professor of Medicine, Director, Bariatric and Metabolic Endoscopy, Center for Endoscopic Research and Therapeutics, The University of Chicago Medicine and Biological Sciences, Chicago, Illinois

William C. Chapman, MD, FACS  
Surgery, Washington University, St. Louis, Missouri

Susannah Cheek, MD  
Clinical Instructor in Surgery, University of Pittsburgh, Pittsburgh, Pennsylvania

Harvey S. Chen, MD  
Department of Surgery, Mayo Clinic, Rochester, Minnesota

Clifford S. Cho, MD  
Department of Surgery, University of Michigan, Ann Arbor, Michigan

Eric T. Choi, MD  
Chief, Vascular and Endovascular Surgery, Professor of Surgery, Professor, Center for Metabolic Disease Research, Temple University Lewis Katz School of Medicine, Philadelphia, Pennsylvania

Eugene A. Choi, MD  
Associate Professor of Surgery, Baylor College of Medicine, Houston, Texas

Karen A. Chojnacki, MD, FACS  
Associate Professor of Surgery, Thomas Jefferson University, Philadelphia, Pennsylvania

Michael A. Choti, MD, MBA  
Professor, Department of Surgery, University of Texas Southwestern Medical Center, Dallas, Texas

Ian Christie  
Research Assistant, Department of Cardiothoracic Surgery, University of Pittsburgh, Pittsburgh, Pennsylvania

Heidi Chua, MD  
Consultant, Department of Colon and Rectal Surgery, Mayo Clinic, Rochester, Minnesota

James M. Church, MBChB, MMedSci, FRACS  
Staff Surgeon, Colorectal Surgery, Digestive Disease and Surgery Institute, Cleveland Clinic, Cleveland, Ohio

Jessica L. Cioffi, MD  
Assistant Professor of Surgery, University of Florida, Gainesville, Florida

Susannah Clark, MS, MPAS  
Boston, Massachusetts

Pierre-Alain Clavien, MD, PhD  
Professor and Chairman, Department of Surgery, Division of Visceral and Transplant Surgery, University Hospital Zurich, Zurich, Switzerland

Adam Cloud, MD  
Assistant Professor of Surgery, University of Connecticut, Farmington, Connecticut

Paul D. Colavita, MD  
Gastrointestinal and Minimally Invasive Surgery, Carolinas Medical Center, Charlotte, North Carolina

Steven D. Colquhoun, MD  
Professor of Surgery, Chief, Section of Hepatobiliary Surgery, Director of Liver Transplantation, Department of Surgery, University of California, Davis, Davis, California

William Conway, MD  
Surgical Oncology, Ochsner Medical Center, New Orleans, Louisiana

Jonathan Cools-Lartigue, MD, PhD  
Assistant Professor of Surgery, McGill University, Montreal, Quebec, Canada

Willy Coosemans, MD, PhD  
Professor in Surgery, Clinical Head, Department of Thoracic Surgery, University Hospital Leuven, Leuven, Belgium
Edward E. Cornwell III, MD, FACS, FCCM, FWACS
The LaSalle D. Leffal Jr., Professor and Chairman of Surgery, Howard University Hospital, Washington, D.C.

Mario Costantini, MD
Department of Surgical, Oncological, and Gastroenterological Sciences, University and Azienda Ospedaliera of Padua, Padua, Italy

Yvonne Coyle, MD
Medical Director, Oncology Outpatient Services at the Baylor T. Boone Pickens Cancer Hospital; Texas Oncology and the Baylor Charles A. Sammons Cancer Center at the Baylor University Medical Center; Clinical Associate Professor, Texas A&M Health Science Center, College of Medicine, Dallas, Texas

Daniel A. Craig, MD
Assistant Professor of Radiology, Mayo Clinic, Rochester, Minnesota

Kristopher P. Croome, MD, MS
Assistant Professor of Transplant Surgery, Mayo Clinic, Jacksonville, Florida

Joseph J. Cullen, MD
Professor of Surgery, University of Iowa College of Medicine; Chief Surgical Services, Iowa City VA Medical Center, Iowa City, Iowa

Anthony P. D’Andrea, MD, MPH
Department of Surgery, Division of Colon and Rectal Surgery, Icahn School of Medicine at Mount Sinai, New York, New York

Themistocles Dassopoulos, MD
Adjunct Professor of Medicine, Texas A&M University; Director, Baylor Scott and White Center for Inflammatory Bowel Diseases, Dallas, Texas

Marta L. Davila, MD
Professor, Department of Gastroenterology, Hepatology, and Nutrition, The University of Texas MD Anderson Cancer Center, Houston, Texas

Raquel E. Davila, MD
Associate Professor, Department of Gastroenterology, Hepatology, and Nutrition, The University of Texas MD Anderson Cancer Center, Houston, Texas

Steven R. DeMeester, MD, FACS
Division of Foregut and Minimally Invasive Surgery, The Oregon Clinic, Portland, Oregon

Tom R. DeMeester, MD
Professor and Chairman Emeritus, Department of Surgery, University of Southern California, Los Angeles, California

Daniel T. Dempsey, MD, MBA
Professor of Surgery, University of Pennsylvania; Assistant Director, Perioperative Services, Hospital of the University of Pennsylvania, Philadelphia, Pennsylvania

Gregory dePrisco, MD
Diagnostic Radiologist, Baylor University Medical Center, Dallas, Texas

Lieven Depypere, MD
Joint Clinical Head, Department of Thoracic Surgery, University Hospital Leuven, Leuven, Belgium

David W. Dietz, MD, FACS, FASCRS
Chief, Division of Colorectal Surgery, Vice Chair, Clinical Operations and Quality, Vice President, System Surgery Quality and Experience, University Hospitals, Cleveland, Ohio

Mary E. Dillhoff, MD, MS
Assistant Professor of Surgery, The Ohio State University College of Medicine, Columbus, Ohio

Joseph DiNorcia, MD
Assistant Professor of Surgery, David Geffen School of Medicine, University of California, Los Angeles, Los Angeles, California

Stephen M. Doane, MD
Advanced Gastrointestinal Surgery Fellow, Department of Surgery, Thomas Jefferson University Hospital, Philadelphia, Pennsylvania

Epameinondas Dogeas, MD
Resident, Department of Surgery, University of Texas Southwestern Medical Center, Dallas, Texas

Eric J. Dozois, MD, FACS, FASCRS
Colon and Rectal Surgery, Mayo Clinic, Rochester, Minnesota

Kristoffel Dumon, MD
Associate Professor of Surgery, Hospital of the University of Pennsylvania, Philadelphia, Pennsylvania

Stephen P. Dunn, MD
Chairman, Department of Surgery, Nemours/Alfred I. DuPont Hospital for Children, Wilmington, Delaware; Professor of Surgery, Sidney Kimmel Medical College, Thomas Jefferson University, Philadelphia, Pennsylvania

Christy M. Dunst, MD
Co-Program Director, Advanced GI-Foregut Fellowship, Cancer Center, Providence Portland Medical Center; Foregut Surgeon, Gastrointestinal and Minimally Invasive Surgery, The Oregon Clinic, Portland, Oregon

John N. Dussel, MD
Fellow in Vascular Surgery, University of Connecticut, Farmington, Connecticut

Matthew Dyer, BA
Case Western Reserve University School of Medicine, Cleveland, Ohio

Jonathan Efron, MD
Associate Professor of Surgery and Urology, Johns Hopkins University, Baltimore, Maryland
CONTRIBUTORS

Yousef El-Gohary, MD
Department of General Surgery, Stony Brook University School of Medicine, New York, New York

Mustapha El Lakis, MD
Thoraco-Esophageal Postdoctoral Research Fellow, General, Vascular, and Thoracic Surgery, Virginia Mason Medical Center, Seattle, Washington

E. Christopher Ellison, MD
Robert M. Zollinger and College of Medicine Distinguished Professor of Surgery, The Ohio State University College of Medicine, Columbus, Ohio

James Ellsmere, MD, MSc, FRCSC
Division of General Surgery, Dalhousie University, Halifax, Nova Scotia, Canada

Rahila Essani, MD, FACS
Department of Surgery, Baylor Scott and White Healthcare, Texas A&M University College of Medicine, Temple, Texas

Douglas B. Evans, MD
Professor and Chair of Surgery, Medical College of Wisconsin, Milwaukee, Wisconsin

Sandy H. Fang, MD
Assistant Professor, Department of Surgery, Johns Hopkins Medical Institutions, Baltimore, Maryland

Geoffrey Fasen, MD, MS
Clinical Instructor in General Surgery, University of Virginia, Charlottesville, Virginia

Hiran C. Fernando, MBBS, FRCS, FRCSced
Department of Surgery, Inova Fairfax Medical Campus, Falls Church, Virginia

Lorenzo Ferri, MD, PhD
Professor of Surgery, McGill University, Montreal, Quebec, Canada

Alessandro Fichera, MD, FACS, FASCRS
Professor and Section Chief, Gastrointestinal Surgery, University of Washington Medical Center, Seattle, Washington

Christine Finck, MD
Chief, Division of Pediatric Surgery, Donald Hight Endowed Chair, Surgery, Connecticut Children’s Medical Center, Hartford, Connecticut; Associate Professor of Pediatrics and Surgery, University of Connecticut Health Center, Farmington, Connecticut

Oliver M. Fisher, MD
Gastroesophageal Cancer Program, St. Vincent’s Centre for Applied Medical Research, Department of Surgery, University of Notre Dame School of Medicine, Sydney, Australia

James W. Fleshman, MD, FACS
Seeger Professor and Chairman of Surgery, Baylor University Medical Center; Professor of Surgery, Texas A&M Health Science Center, Dallas, Texas

Yuman Fong, MD
Chairman, Department of Surgery, City of Hope National Medical Center, Duarte, California

Michael L. Foreman, MS, MD
Chief, Division of Trauma, Critical Care, and Acute Care Surgery, Department of Surgery, Baylor University Medical Center; Professor of Surgery, Texas A&M Health Science Center, College of Medicine, Dallas, Texas

Todd D. Francone, MD, MPH, FACS, FASCRS
Chief, Division of Colon and Rectal Surgery, Newton-Wellesley Hospital; Director, Robotic Surgery, Newton-Wellesley Hospital; Associate Chair, Department of Surgery, Newton-Wellesley Hospital; Staff Surgeon, Massachusetts General Hospital; Assistant Professor of Surgery, Tufts Medical School, Boston, Massachusetts

Edward R. Franko, MD, FACS
Assistant Professor of Surgery, Texas A&M University College of Medicine, Dallas, Texas

Daniel French, MD, MAsc, FRCSC
Assistant Professor, Division of Thoracic Surgery, Dalhousie University, Halifax, Nova Scotia, Canada

Hans Friedrich Fuchs, MD
Department of Surgery, University Hospital Cologne, Cologne, Germany

Karl Hermann Fuchs, MD
Professor, Department of Surgery, Agaplesion Markus Hospital, Frankfurt, Germany

Brian Funaki, MD
Professor of Radiology, The University of Chicago Pritzker School of Medicine; Section Chief, Division of Vascular and Interventional Radiology, The University of Chicago Medicine, Chicago, Illinois

Geoffrey A. Funk, MD, FACS
Trauma and General Surgery, Surgical Critical Care, Assistant Professor of Surgery, Texas A&M University College of Medicine, Dallas, Texas

Joseph Fusco, MD
Children’s Hospital of Pittsburgh, University of Pittsburgh, Pittsburgh, Pennsylvania

Shrawan G. Gaitonde, MD
Fellow, Surgical Oncology, John Wayne Cancer Institute at Providence Saint John’s Health Center, Santa Monica, California

Julio Garcia-Aguilar, MD, PhD
Chief, Colorectal Service, Department of Surgery, Benno C. Schmidt Chair in Surgical Oncology, Memorial Sloan Kettering Cancer Center; Professor of Surgery, Weill Cornell Medical College, New York, New York

Susan Gearhart, MD
Associate Professor of Surgery, Johns Hopkins Medical Institutions, Baltimore, Maryland
David A. Geller, MD, FACS
Richard L. Simmons Professor of Surgery, Chief, Division of Hepatobiliary and Pancreatic Surgery, University of Pittsburgh, Pittsburgh, Pennsylvania

Comeran Ghobadi, MD
Department of Radiology, The University of Chicago Medicine, Chicago, Illinois

Sebastien Gilbert, MD
Associate Professor of Surgery, University of Ottawa; Chief, Division of Thoracic Surgery, Department of Surgery, Clinician Investigator, The Ottawa Hospital Research Institute, The Ottawa Hospital, Ottawa, Ontario, Canada

David Giles, MD
Associate Clinical Professor of Surgery, University of Connecticut School of Medicine, Farmington, Connecticut

Erin Gillaspie, MD
Assistant Professor, Department of Thoracic Surgery, Vanderbilt University Medical Center, Nashville, Tennessee

Micah Girotti, MD
Division of Vascular Surgery, Northwestern University Feinberg School of Medicine, Chicago, Illinois

George K. Gittes, MD
Professor of Surgery, Surgeon-in-Chief, Children’s Hospital of Pittsburgh, University of Pittsburgh School of Medicine, Pittsburgh, Pennsylvania

Michael D. Goodman, MD
Assistant Professor of Surgery, University of Cincinnati, Cincinnati, Ohio

Hein G. Gooszen, MD, PhD
Professor, Department of Operating Room/Evidence Based Surgery, Radboud University Medical Center, Nijmegen, The Netherlands

Gregory J. Gores, MD
Executive Dean for Research, Professor of Medicine, Division of Gastroenterology and Hepatology, Mayo Clinic, Rochester, Minnesota

James F. Griffin, MD
Surgical Resident, Department of Surgery, The Johns Hopkins Hospital, Baltimore, Maryland

S. Michael Griffin, OBE, MD, FRCSed
Professor, Consultant Oesophagogastric Surgeon, Northern Oesophagogastric Cancer Unit, Royal Victoria Infirmary, Newcastle-upon-Tyne, United Kingdom

Leander Grimm Jr., MD, FACS, FASCRS
Assistant Professor of Surgery, Division of Colon and Rectal Surgery, University of South Alabama, Mobile, Alabama

L.F. Grochola, MD, PhD
Department of Visceral and Transplant Surgery, University Hospital Zurich, Zurich, Switzerland

Fahim Habib, MD, MPH, FACS
Esophageal and Lung Institute, Allegheny Health Network, Pittsburgh, Pennsylvania

John B. Hanks, MD
C. Bruce Morton Professor and Chief, Division of General Surgery, Department of Surgery, University of Virginia Health System, Charlottesville, Virginia

James E. Harris Jr., MD
Assistant Professor of Surgery, The Johns Hopkins Hospital, Baltimore, Maryland

Matthew G. Hartwig, MD
Associate Professor of Surgery, Division of Thoracic and Cardiovascular Surgery, Department of Surgery, Duke University Hospital, Durham, North Carolina

Imran Hassan, MD, FACS
Clinical Associate Professor of Surgery, Carver College of Medicine, University of Iowa Health Care, Iowa City, Iowa

Traci L. Hedrick, MD, MS
Associate Professor of Surgery, University of Virginia Health System, Charlottesville, Virginia

Terry C. Hicks, MD, FACS, FASCRS
Colorectal Surgeon, Department of Colon and Rectal Surgery, Ochsner Medical Center, New Orleans, Louisiana

Richard Hodin, MD
Department of Surgery, Massachusetts General Hospital, Boston, Massachusetts

Wayne L. Hofstetter, MD
Professor of Surgery and Deputy Chair, Department of Thoracic and Cardiovascular Surgery, The University of Texas MD Anderson Cancer Center, Houston, Texas

Melissa Hogg, MD, MS
Assistant Professor of Surgery, Division of Surgical Oncology, University of Pittsburgh Medical Center, Pittsburgh, Pennsylvania

Yue-Yung Hu, MD, MPH
Pediatric Surgery Fellow, Connecticut Children’s Medical Center, Hartford, Connecticut

Steven R. Hunt, MD
Associate Professor of Surgery, Division of General Surgery, Section of Colon and Rectal Surgery, Washington University School of Medicine, St. Louis, Missouri

Khumara Huseynova, MD
Assistant Professor of Vascular and Endovascular Surgery, West Virginia University, Morgantown, West Virginia
Neil H. Hyman, MD
Chief, Section of Colon and Rectal Surgery, Co-Director, Digestive Disease Center, Department of Surgery, The University of Chicago Medicine, Chicago, Illinois

David A. Iannitti, MD
Chief, Division of Hepatobiliary and Pancreatic Surgery, Department of Surgery, Carolinas HealthCare System, Charlotte, North Carolina

Jeffrey Indes, MD
Associate Professor of Surgery, Section of Vascular Surgery, University of Connecticut, Farmington, Connecticut

Megan Jenkins, MD
Department of Surgery, New York University Langone Medical Center, New York, New York

Todd Jensen, MSc
Research Associate, University of Connecticut, Farmington, Connecticut

Paul M. Jeziorsczak, MD
Senior Fellow, Division of Pediatric Surgery, St. Louis Children’s Hospital, St. Louis, Missouri

Danial Jilani, MD
Department of Radiology, The University of Chicago Medicine, Chicago, Illinois

Marta Jiménez-Toscano, MD, PhD
Gastrointestinal Surgery Department, Hospital Clinic of Barcelona, Barcelona, Spain

Blair A. Jobe, MD, FACS
Director, Esophageal and Lung Institute, Allegheny Health Network; Clinical Professor of Surgery, Temple University School of Medicine, Pittsburgh, Pennsylvania

Lily E. Johnston, MD, MPH
Resident, Department of Surgery, University of Virginia Health System, Charlottesville, Virginia

Peter J. Kahrilas, MD
Gilbert H. Marquardt Professor of Medicine, Northwestern University Feinberg School of Medicine, Chicago, Illinois

Matthew F. Kalady, MD
Professor of Surgery, Colorectal Surgery, Co-Director, Comprehensive Colorectal Cancer Program, Digestive Disease and Surgery Institute, Cleveland Clinic, Cleveland, Ohio

Noor Kassira, MD
Assistant Professor of Surgery, Division of Pediatric Surgery, University of South Florida, Morsani College of Medicine, Tampa, Florida

Namir Katkhouda, MD, FACS
Professor of Surgery, Division of Upper Gastrointestinal and General Surgery, Keck School of Medicine of the University of Southern California, Los Angeles, California

Philip O. Katz, MD, FACP
Director of Motility Laboratories, Jay Monahan Center for Gastrointestinal Health, Weill Cornell Medicine, New York, New York

Deborah S. Keller, MS, MD
Department of Surgery, Baylor University Medical Center, Dallas, Texas

Matthew P. Kelley, MD
General Surgery Resident, Johns Hopkins Medical Institutions, Baltimore, Maryland

Gregory D. Kennedy, MD, PhD
Professor of Surgery, University of Alabama Birmingham, Birmingham, Alabama

Tara Sotsky Kent, MD, MS
Assistant Professor of Surgery, Harvard Medical School, Beth Israel Deaconess Medical Center, Boston, Massachusetts

Leila Kia, MD
Department of Medicine, Northwestern University Feinberg School of Medicine, Chicago, Illinois

Melina R. Kibbe, MD
Chair, Department of Surgery, The University of North Carolina at Chapel Hill, Chapel Hill, North Carolina

John Kim, DO, MPH, FACS
Clinical Assistant Professor of Surgery, Clerkship Director, Surgery, University of Illinois College of Medicine, Champaign-Urbana, Illinois; Attending Surgeon, Acute Care Surgery and Trauma, Carle Foundation Hospital, Urbana, Illinois

Alice King, MD
Junior Fellow, Division of Pediatric Surgery, St. Louis Children’s Hospital, St. Louis, Missouri

Ravi P. Kiran, MBBS, MS, FRCS (Eng), FRCS (Glas), FACS, MSc EBM (Oxford)
Kenneth A. Forde Professor of Surgery in Epidemiology, Division Chief and Program Director, Director, Center for Innovation and Outcomes Research, Division of Colorectal Surgery, NewYork-Presbyterian Hospital/Columbia University Medical Center, New York, New York

Orlando C. Kirton, MD, FACS, MCCM, FCCP, MBA
Surgeon-in-Chief, Chairman of Surgery, Abington-Jefferson Health; Professor of Surgery, Sidney Kimmel Medical College of Thomas Jefferson University, Abington, Pennsylvania

Andrew Klein, MD, MBA, FACS
Professor and Vice Chairman, Department of Surgery, Director, Comprehensive Transplant Center, Cedars-Sinai Medical Center, Los Angeles, California

Eric N. Klein, MD
Acute Care Surgeon, North Shore University Hospital, Manhasset, New York

Geoffrey P. Kohn, MBBS(Hons), MSurg, FRACS, FACS
Senior Lecturer, Department of Surgery, Monash University, Melbourne, Australia; Upper Gastrointestinal Surgeon, Melbourne Upper Gastrointestinal Surgical Group, Melbourne, Victoria, Australia
Robert Caleb Kovell, MD
Assistant Professor of Clinical Urology in Surgery,
Department of Urology Surgery, Perelman School of Medicine, University of Pennsylvania, Philadelphia, Pennsylvania

Robert Kozol, MD
General Surgery, JFK Medical Center, Atlantis, Florida

Antonio M. Lacy, MD, PhD
Chief, Gastrointestinal Surgery, Hospital Clinic of Barcelona, Barcelona, Spain

Daniela P. Ladner, MD, MPH, FACS
Associate Professor of Transplant Surgery, Division of Organ Transplantation, Feinberg School of Medicine, Northwestern University; Director, Northwestern University Transplant Outcomes Research Collaborative, Northwestern University, Chicago, Illinois

S.M. Lagarde, MD, PhD
Department of Surgery, Erasmus MC–University Medical Center Rotterdam, Rotterdam, The Netherlands

Carrie A. Laituri, MD
Assistant Professor of Surgery, Division of Pediatric Surgery, University of South Florida, Morsani College of Medicine, Tampa, Florida

Alessandra Landmann, MD
Resident Physician, Department of Surgery, University of Oklahoma, Oklahoma City, Oklahoma

Janet T. Lee, MD, MS
Clinical Assistant Professor of Surgery, University of Minnesota, St. Paul, Minnesota

Lawrence L. Lee, MD, PhD, FRCSC
Department of Colon and Rectal Surgery, Center for Colon & Rectal Surgery, Florida Hospital, Orlando, Florida

Department of Surgery, Washington University School of Medicine, St. Louis, Missouri

Toni Lerut, MD, PhD
Emeritus Professor of Surgery, Clinical Head, Department of Thoracic Surgery, University Hospital Leuven, Leuven, Belgium

David M. Levi, MD
Transplant Surgeon, Carolinas Medical Center, Charlotte, North Carolina

Chao Li, MD, MSc, FRCSC
Division of General Surgery, Dalhousie University, Halifax, Nova Scotia, Canada

Yu Liang, MD
Department of Surgery, University of Connecticut Health Center, Farmington, Connecticut

Andrew H. Lichliter, MD
Diagnostic Radiology Resident, Baylor University Medical Center, Dallas, Texas

Warren E. Lichliter, MD
Chief, Colon and Rectal Surgery, Baylor Scott and White Health, Dallas, Texas

Amy L. Lightner, MD
Senior Associate Consultant, Department of Colon and Rectal Surgery, Mayo Clinic, Rochester, Minnesota

Deacon J. Lile, MD
Department of General Surgery, Temple University Hospital, Philadelphia, Pennsylvania

Keith D. Lillemoe, MD, FACS
W. Gerald Austen Professor of Surgery, Harvard Medical School; Surgeon-in-Chief, The Massachusetts General Hospital, Boston, Massachusetts;

Jules Lin, MD, FACS
Associate Professor, Mark B. Orringer Professor, Section of Thoracic Surgery, University of Michigan, Ann Arbor, Michigan

Shu S. Lin, MD, PhD
Associate Professor of Surgery, Pathology, and Immunology, Duke University Medical Center, Durham, North Carolina

John C. Lipham, MD, FACS
Chief, Division of Upper Gastrointestinal and General Surgery, Associate Professor of Surgery, Keck School of Medicine of the University of Southern California, Los Angeles, California

Virginia R. Little, MD
Professor of Surgery, Division of Thoracic Surgery, Boston University, Boston, Massachusetts

Nayna A. Lodhia, MD
Resident, Department of Internal Medicine, The University of Chicago Medicine, Chicago, Illinois

Walter E. Longo, MD, MBA
Colon and Rectal Surgery, Yale University School of Medicine, New Haven, Connecticut

Reginald V.N. Lord, MBBS, MD, FRACS
Director, Gastroesophageal Cancer Program, St. Vincent’s Centre for Applied Medical Research; Professor and Head of Surgery, University of Notre Dame School of Medicine, Sydney, Australia

Brian E. Louie, MD, MPH, MHA
Director, Thoracic Research and Education, Division of Thoracic Surgery, Swedish Cancer Institute and Medical Center, Seattle, Washington

Donald E. Low, MD, FACS, FRCS(C)
Head of Thoracic Surgery and Thoracic Oncology, General, Vascular, and Thoracic Surgery, Virginia Mason Medical Center, Seattle, Washington

Val J. Lowe, MD
Professor of Radiology/Nuclear Medicine, Mayo Clinic, Rochester, Minnesota
Jessica G.Y. Luc, MD  
Faculty of Medicine and Dentistry, University of Alberta, Alberta, Canada

James D. Luketich, MD  
Henry T. Bahnson Professor and Chairman, Department of Cardiothoracic Surgery, Chief, Division of Thoracic and Foregut Surgery, University of Pittsburgh School of Medicine, Pittsburgh, Pennsylvania

Yanling Ma, MD  
Pathologist, Department of Surgical Pathology, Los Angeles County + University of Southern California Medical Center; Associate Professor of Pathology, Keck School of Medicine of the University of Southern California, Los Angeles, Los Angeles, California

Robert L. MacCarty, MD  
Professor of Diagnostic Radiology, Emeritus, Mayo Clinic College of Medicine, Rochester, Minnesota

Blair MacDonald, MD, FRCPC  
Associate Professor of Medical Imaging, University of Ottawa; Clinical Investigator, The Ottawa Hospital Research Institute; Gastrointestinal Radiologist, The Ottawa Hospital, Ottawa, Ontario, Canada

Robert D. Madoff, MD  
Professor of Surgery, University of Minnesota, Minneapolis, Minnesota

Deepa Magge, MD  
Fellow in Surgical Oncology, Division of Surgical Oncology, University of Pittsburgh Medical Center, Pittsburgh, Pennsylvania

Anurag Maheshwari, MD  
Clinical Assistant Professor of Medicine, Division of Gastroenterology and Hepatology, University of Maryland School of Medicine; Consultant Transplant Hepatologist, Institute for Digestive Health and Liver Diseases, Mercy Medical Center, Baltimore, Maryland

Najjia N. Mahmoud, MD  
Professor of Surgery, Division of Colon and Rectal Surgery, University of Pennsylvania, Philadelphia, Pennsylvania

David A. Mahvi, MD  
Brigham and Women’s Hospital, Boston, Massachusetts

David M. Mahvi, MD  
Professor of Surgery, Northwestern University School of Medicine, Chicago, Illinois

Grace Z. Mak, MD  
Associate Professor, Section of Pediatric Surgery, Department of Surgery, The University of Chicago Medicine and Biological Sciences, Chicago, Illinois

Sara A. Mansfield, MD, MS  
Clinical Housestaff, Department of Surgery, The Ohio State University Wexner Medical Center, Columbus, Ohio

Maricarmen Manzano, MD  
Division of Gastroenterology, National Cancer Institute of Mexico, Mexico City, Mexico

David J. Maron, MD, MBA  
Vice Chair, Department of Colorectal Surgery, Director, Colorectal Surgery Residency Program, Cleveland Clinic Florida, Weston, Florida

Melvy S. Mathew, MD  
Assistant Professor of Radiology, The University of Chicago Pritzker School of Medicine; Division of Body Imaging, The University of Chicago Medicine, Chicago, Illinois

Kellie L. Mathis, MD  
Surgery, Mayo Clinic, Rochester, Minnesota

Jeffrey B. Matthews, MD, FACS  
Dallas B. Phemister Professor and Chairman of Surgery, The University of Chicago, Chicago, Illinois

David W. McFadden, MD, MBA, FACS  
Chairman, Department of Surgery, University of Connecticut; Surgeon-in-Chief, University of Connecticut Health, Farmington, Connecticut

Amit Merchea, MD, FACS, FASCRS  
Assistant Professor of Surgery, Colon and Rectal Surgery, Mayo Clinic, Jacksonville, Florida

Evangelos Messaris, MD, PhD  
Associate Professor of Surgery, Pennsylvania State University, College of Medicine, Hershey, Pennsylvania

Daniel L. Miller, MD  
Clinical Professor of Surgery, Medical College of Georgia, Augusta University, Augusta, Georgia; Chief, General Thoracic Surgery, Program Director, General Surgery Residency Program, Kennestone Regional Medical Center, WellStar Health System/Mayo Clinic Care Network, Marietta, Georgia

Heidi J. Miller, MD, MPH  
Assistant Professor of Surgery, University of New Mexico, Sandoval Regional Medical Center, Albuquerque, New Mexico

J. Michael Millis, MD, MBA  
Professor of Surgery, Transplant Surgery, The University of Chicago, Chicago, Illinois

Sumeet K. Mittal, MD, FACS, MBA  
Surgical Director, Esophageal and Foregut Program, Norton Thoracic Institute, St. Joseph’s Hospital and Medical Center, Phoenix, Arizona

Daniela Molena, MD  
Surgical Director, Esophageal Cancer Surgery Program, General Surgery Department, Thoracic Surgery Service, Memorial Sloan Kettering Cancer Center, New York, New York
Stephanie C. Montgomery, MD, FACS
Director of Surgery Education, Saint Francis Hospital and Medical Center; Assistant Professor, University of Connecticut School of Medicine, Hartford, Connecticut

Ryan Moore, MD
Department of General Surgery, Temple University Hospital, Philadelphia, Pennsylvania

Katherine A. Morgan, MD, FACS
Professor of Surgery, Chief, Division of Gastrointestinal and Laparoscopic Surgery, Medical University of South Carolina, Charleston, South Carolina

Melinda M. Mortenson, MD
Department of Surgery, Permanente Medical Group, Sacramento, California

Michael W. Mulholland, MD, PhD
Department of Surgery, University of Michigan, Ann Arbor, Michigan

Michael S. Mulvihill, MD
Resident Surgeon, Department of Surgery, Duke University, Durham, North Carolina

Matthew Mutch, MD
Chief, Section of Colon and Rectal Surgery, Associate Professor of Surgery, Washington University, St. Louis, Missouri

Philippe Robert Nafteux, MD, PhD
Assistant Professor in Surgery, Clinical Head, Department of Thoracic Surgery, University Hospital Leuven, Leuven, Belgium

Arun Nagaraju, MD
Department of Radiology, The University of Chicago Medicine, Chicago, Illinois

David M. Nagorney, MD, FACS
Professor of Surgery, Mayo Clinic, Rochester, Minnesota

Hari Nathan, MD, PhD
Department of Surgery, University of Michigan, Ann Arbor, Michigan

Karen R. Natoli, MD
Department of Surgery, Community Hospital, Indianapolis, Indiana

Rakesh Navuluri, MD
Department of Radiology, The University of Chicago Medicine, Chicago, Illinois

Nicholas N. Nissen, MD
Director, Liver Transplant and Hepatopancreatobiliary Surgery, Cedars-Sinai Medical Center, Los Angeles, California

Tamar B. Nobel, MD
Department of Surgery, Mount Sinai Hospital, New York, New York

B.J. Noordman, MD
Department of Surgery, Erasmus MC–University Medical Center Rotterdam, Rotterdam, The Netherlands

Jeffrey A. Norton, MD
Professor of Surgery, Stanford University School of Medicine, Stanford, California

Yuri W. Novitsky, MD
Director, Cleveland Comprehensive Hernia Center, University Hospitals Cleveland Medical Center; Professor of Surgery, Case Western Reserve School of Medicine, Cleveland, Ohio

Michael S. Nussbaum, MD, FACS
Professor and Chair, Department of Surgery, Virginia Tech Carilion School of Medicine, Roanoke, Virginia

Scott L. Nyberg, MD, PhD
Professor of Biomedical Engineering and Surgery, Department of Transplantation Surgery, Mayo Clinic, Rochester, Minnesota

Brant K. Oelschlager, MD
Byers Endowed Professor of Esophageal Research, Chief, Division of General Surgery, University of Washington Medical Center; Vice Chair, Department of Surgery, University of Washington, Seattle, Washington

Daniel S. Oh, MD
Assistant Professor of Surgery, Thoracic Surgery, University of Southern California, Los Angeles, California

Ana Otero-Piñeiro, MD
Gastrointestinal Surgery Department, Hospital Clinic of Barcelona, Barcelona, Spain

Aytekin Oto, MD
Professor of Radiology, The University of Chicago Pritzker School of Medicine; Section Chief, Division of Body Imaging, The University of Chicago Medicine, Chicago, Illinois

H. Leon Pachter, MD
Chairman, Department of Surgery, New York University Langone Medical Center, New York, New York

Charles N. Paidas, MD, MBA
Professor of Surgery and Pediatrics, Chief, Pediatric Surgery, Vice Dean for Graduate Medical Education, University of South Florida, Morsani College of Medicine, Tampa, Florida

Francesco Palazzo, MD
Associate Professor of Surgery, Thomas Jefferson University, Philadelphia, Pennsylvania

Alessandro Paniccia, MD
General Surgery Resident, University of Colorado School of Medicine, Aurora, Colorado

Harry T. Papaconstantinou, MD, FACS, FACRS
Department of Surgery, Baylor Scott and White Healthcare, Texas A&M University College of Medicine, Temple, Texas
CONTRIBUTORS

Theodore N. Pappas, MD, FACS
Distinguished Professor of Surgical Innovation, Chief of Advanced Oncologic and Gastrointestinal Surgery, Duke University School of Medicine, Durham, North Carolina

Emmanouil P. Pappou, MD, PhD
Assistant Professor of Colorectal Surgery, Columbia University Medical Center, New York, New York

Manish Parikh, MD
Associate Professor of Surgery, New York University Langone Medical Center/Bellevue Hospital, New York, New York

Preface

The time has come to release the eighth edition of the classic textbook *Shackelford’s Surgery of the Alimentary Tract*. This publication has served as an important resource for surgeons, internists, gastroenterologists, residents, medical students, and other medical professionals over the past 61 years. I hope that you will find the eighth edition brimming with new information, beautifully illustrated, up to date, and educationally fulfilling.

**BRIEF HISTORY**

The first edition of *Surgery of the Alimentary Tract* was written solely by Dr. Richard T. Shackelford, a Baltimore surgeon, and was published in 1955. Following the success of the first edition, the book’s publisher, W.B. Saunders Company, urged Dr. Shackelford to produce a second edition. A second edition was released, as separate five-volume tomes, between 1978 and 1986, with Dr. Shackelford enlisting the assistance of Dr. George D. Zuidema, the Chairman of the Department of Surgery at Johns Hopkins, as co-editor. It was the second edition that served as my “bible” for alimentary tract diseases during my surgical residency and early faculty appointment.

The third edition, edited by Dr. Zuidema, was published as a five-volume set in 1991 and proved to be a major tour de force. The field of alimentary tract surgery had advanced, new research findings were included in the edition, and emerging techniques were illustrated. For the third edition, Dr. Zuidema enlisted the help of a guest editor for each of the five volumes.

The fourth edition, again headed by Dr. Zuidema, was published in 1996 and remained encyclopedic in scope, breadth, and depth of coverage. The textbook had become a classic reference source for surgeons, internists, gastroenterologists, and other health care professionals involved in the care of patients with alimentary tract diseases.

The fifth edition was published in 2002. At that time, Dr. Zuidema asked me to join him as a co-editor. The fifth edition remained a five-volume set, and it was filled with new operative techniques, advances in molecular biology, and noninvasive therapies. It marked progress in the co-management of patients by open surgical, laparoscopic surgical, and endoscopic techniques.

In 2007, the sixth edition of *Shackelford’s Surgery of the Alimentary Tract* was published. The look of the sixth edition was changed. The book went from five volumes to two volumes with the deletion of outdated material, and it included a four-color production scheme, emphasized new procedures, and focused on advances in technology. In 2012, the seventh edition was published.

**THE EIGHTH EDITION**

The eighth edition maintains the exterior changes and look of the sixth and seventh editions. However, the eighth edition has been carefully planned by me and the four expert section editors to represent the current state of alimentary tract surgery as practiced throughout the world. This edition has been completed with an enormous amount of assistance from my four colleagues, who have served as editors for the four major sections of the book. These section editors have worked tirelessly, planning, organizing, and developing this massive textbook. They have incorporated numerous changes in surgical practice, operative techniques, and noninvasive therapies within the text. Although each area does retain sections on anatomy and physiology, the numerous advances in genomics, proteomics, laparoscopic techniques, and robotics are included. The eighth edition includes the contributions of two new and two retained section editors from the seventh edition, providing both innovation and stability.

Section I, Esophagus and Hernia, is now edited by Dr. Steven R. DeMeester, a Professor of Surgery at the University of Southern California, in Los Angeles. Dr. DeMeester is a nationally and internationally known expert who brings his detailed knowledge of the esophagus and esophageal diseases to the textbook. Dr. DeMeester is the son of Dr. Tom DeMeester, a legendary individual who has made numerous contributions to the field. Steve has enlisted new authors for his chapters and has put together a spectacular section on esophageal diseases, including pathology and ambulatory diagnostics, extensive sections on gastroesophageal reflux disease, esophageal motility disorders, and esophageal neoplasia.

Dr. David W. McFadden remains as the editor for Section II, Stomach and Small Intestine. Dr. McFadden works at the University of Connecticut in Farmington, Connecticut, serving as the Professor and Chairman of the Department of Surgery and the Surgeon in Chief of their health system. Dr. McFadden is an expert in alimentary tract diseases, surgical research, and education. He served for many years as the co-editor-in-chief of the *Journal of Surgical Research*, and he has served as the president of the Society for Surgery of the Alimentary Tract. He has done a superb job of enlisting many new chapter authors so as to present an updated section regarding the luminal structures of the upper gastrointestinal system. Dr. McFadden’s section is an outstanding contribution to this area.

For Section III, Pancreas, Biliary Tract, Liver, and Spleen, we have retained our section editor, Dr. Jeffrey B. Matthews, the Dallas B. Phemister Professor and Chairman of the Department of Surgery at the University of Chicago, in Chicago, Illinois. Dr. Matthews’ surgical career has focused on diseases of the nonluminal structures of the alimentary tract, and he has done a superb job in enlisting new contributors and reorganizing this section. Dr. Matthews’ credentials include serving as the editor-in-chief of the *Journal of Gastrointestinal Surgery*, and he is also a recent past president of the Society for Surgery of the Alimentary Tract. This section serves as an outstanding contribution to the field.
Finally, Section IV, Colon, Rectum, and Anus, has been designed and reorganized by Dr. James W. Fleshman, the Seeger Professor and Chairman of the Department of Surgery at Baylor University Medical Center. Dr. Fleshman is an internationally known figure in his field, and his section has been totally reorganized. Included are various new developments in the field, updates on pelvic floor anatomy and physiology, new therapies for inflammatory bowel disease, increased emphasis on laparoscopic interventions, and new chapters dealing with the topics not previously presented.
ACKNOWLEDGMENTS

The eighth edition would have been impossible to complete without the expertise, dedication, and hard work of each of these four expert section editors. They have been helped immensely by their colleagues, staff, and all the chapter contributors. I would like to thank each of these section editors for their vision, dedication, expertise, and incredible hard work in bringing this project to fruition.

As is often the case with printed works of this size, hundreds of individuals have contributed chapters to this edition. In fact, hundreds of contributors are listed in the contributors section. We understand how difficult it is to produce superb chapters, and I wish to recognize these individuals and thank them for their dedication and commitment. Most of these contributors are nationally and internationally known leaders in their fields. I am deeply indebted to them for sharing their knowledge and enthusiasm about their topic, culminating in an outstanding overall product.

I would also like to thank the publishing team at Elsevier, who again have been instrumental in making this edition a reality. My thanks go out to Michael Houston, Mary Hegeler, Amanda Mincher, and many others who have been involved in overseeing this project. This edition represents an enormous amount of new work, and thousands of hours have been spent on its production. These professionals have made it a labor of love to work on this project.

Finally, I must thank individuals who have helped me during this new edition process over the past three years. Here in my office at Thomas Jefferson University, accolades go out to Claire Reinke, Dominique Vicchairelli, and Laura Mateer who have been outstanding assistants in bringing this work to fruition.

Charles J. Yeo, MD
The esophagus is a muscular tube connecting the mouth with the stomach. The main function of the esophagus is transport of fluids and food to ensure regular nutrition of the body. At the proximal and distal end of the tube, special boundaries are necessary to fulfill complex functional tasks such as swallowing, belching, and vomiting and allowing breathing and coughing, while preventing substantial reflux of gastric contents into the esophagus. The proximal part of the esophagus and its upper esophageal sphincter (UES) comprise mainly striated musculature. In the esophageal corpus, a few centimeters below the UES, the structure switches through a zone of mixed striated-smooth muscle to the distal esophagus including the lower esophageal sphincter (LES) with complete smooth muscle structures. The complex function of the two sphincters is regulated and influenced by neural innervations, pressure systems, hormonal and chemical influences, and external and possible psychological factors.

**UPPER ESOPHAGEAL SPHINCTER IN HEALTH**

**SWALLOWING PROCESS**

The UES is involved in the swallowing process. This process is complex and requires a number of important features to temporarily change the pathway of breathing air between the mouth, nose, pharynx, and the trachea into the channel for passing liquid and food farther into the esophagus.

The main anatomic structures of the upper boundary of the esophagus are the cricopharyngeal muscle connected to the cricoid cartilage. Because there is no circular symmetric muscle structure, but instead a ventral cartilage with lateral and dorsal muscular parts, the resulting pressure profile of the UES is not symmetric. It is important to note that the anatomic relations functionally change during swallowing. The UES moves upward approximately 1 cm because of the laryngeal upward swing. The innervation of the UES is mainly achieved by the vagus nerve and, to a lesser extent, by cranial nerves IX and XII.

Swallowing is a complex process and the UES is involved in the pharyngeal phase, which occurs later in the swallowing process. Depending on the respective author, swallowing can be described in three to six different phases. Three main phases are often differentiated: the oral, pharyngeal, and esophageal phase.

In the oral phase, the tongue and the surrounding structures of the pharynx, the soft and hard palate, and the closed glosso-palatal area form a bolus (Fig. 1.1). This process is started by will of the individual. The first step of bolus formation is performed by the soft palate and the posterior aspect of the tongue. The second component of the oral phase is the upward movement of the soft palate toward the hard palate, closing the nasopharynx, and the upward swing of the hyoid bone more ventrally.

When the tongue creates more pressure on the bolus toward the soft and hard palates, the bolus is propelled through the glosso-palatal opening and enters the pharyngeal area, thus representing the transition to the pharyngeal phase (Fig. 1.2). The sequences of the pharyngeal phase happen involuntarily. In health, the most important part of the process is the well-coordinated closure of the airway during the passage of the bolus. The nasopharyngeal area is closed by the soft palate and the posterior pharyngeal wall. The muscles of the floor of the mouth pull the hyoid bone, and subsequently the larynx and cricoid, anteriorly and upward, thus allowing the epiglottis to flip downward and close off the airways.

The constrictor pharyngeal muscle contracts, and the UES is opened by approximately 1 second of relaxation. The bolus leaves the pharyngeal area, moves through the hypopharynx, and into the esophagus. The esophageal phase begins as the bolus enters the proximal esophagus through the opened cricopharyngeal sphincter (Fig. 1.3). The peristaltic contractions take over propulsion of the bolus and assist gravity in transporting the bolus through the esophageal corpus. Finally, all structures return to their resting positions, and the airway is opened again as the UES closes.

**ASSESSMENT OF THE UPPER ESOPHAGEAL SPHINCTER**

The UES comprises cricoid cartilage at the ventral border and cricopharyngeal muscle toward its lateral and posterior borders. This structure creates the asymmetric pressure...
ABSTRACT

Introduction: The esophagus is a muscular tube connecting the mouth with the stomach. The main function of the esophagus is the transport of fluids and food to ensure regular nutrition of the body. At the proximal and distal end of the tube, special boundaries are necessary to fulfill complex functional tasks such as swallowing, belching, and vomiting and allowing breathing and coughing, while preventing substantial reflux of gastric contents into the esophagus.

Structures and Function in Health and Disease: This chapter focuses on the upper esophageal sphincter (UES) and the lower esophageal sphincter (LES). The complex functions of the two sphincters are regulated and influenced by neural innervations, pressure systems, hormonal and chemical influences, and external and possible psychological factors. The functional assessment is usually performed by radiographic studies and manometric techniques. There are many disorders that can cause cervical or oropharyngeal dysphagia. This includes myogenic, neurogenic, iatrogenic, mechanical, and psychogenic causes, as well as idiopathic dysfunctions of the UES.

The LES structure is incorporated in the distal esophagus. The major function is the proximal closure of the gastric reservoir to prevent reflux of substantial amounts of gastric contents back into the esophagus. This is important because gastric juice can be toxic for the esophageal mucosa. The major functional finding at the distal esophagus is a high-pressure zone. The most frequent failure of the LES is a weakening causing increased gastroesophageal reflux.

KEYWORDS

Esophagus, upper esophageal sphincter, lower esophageal sphincter, dysphagia, myotomy, achalasia, gastroesophageal reflux disease.
Functional assessment of the UES is usually performed by radiographic studies or manometric techniques. Routine radiographic investigations by barium swallow provide insight into the swallowing process and demonstrate pathologic anatomic alterations such as a Zenker diverticulum. However, a subtle functional failure of the regular swallowing process—for example, as a result of a discrete neurologic defect causing cervical dysphagia—might be missed. High-speed photography using a specialized kinematographic analysis may be necessary to describe dysfunctions in detail.

Video documentation allows for repetitive visualization and analysis of the findings.

Clinical assessment of symptoms is necessary to clearly determine the underlying functional problem and the impact of the disorder on the patient’s quality of life. Endoscopy is important in detecting or excluding malignant disease and obstruction.

Pharyngoesophageal manometric studies can demonstrate the physiologic swallowing function through the UES and possibly its pathologic changes. The UES is asymmetric and changes its pressure profile in milliseconds during swallowing. Consequently, traditional perfusion manometry with a few recorded openings and manometry probes with only a few solid-state pressure transducers cannot demonstrate subtle pressure increases or relaxations or coordination features along the vertical axis. Manometry systems with multiple recording sites along the probe and circumferentially on the probe are necessary to record sufficient data to fully describe the complex process of
